

## Acknowledgements

The Global Methane Tracker was prepared by the World Energy Outlook team in co-operation with the Office of Legal Counsel and other units of the International Energy Agency under the guidance of Tim Gould, Chief Energy Economist, and Christophe McGlade, Head of the Energy Supply Unit. The lead author was Natalie StClair. The report's other main authors were Charlene Bisch (modelling and data management), Félix Gagnon (policy trends, strategies, marketplace), Sadhika Gulati (policy trends, regional insights), Jemima Storey (understanding methane emissions, marketplace, regional insights) and Courtney Turich (strategies, recent insights from methane emissions studies). Other IEA colleagues that provided valuable inputs include Pierre Demey, Jeanne-Marie Hays, Jérôme Hilaire, K.C. Michaels, Ryszard Pospiech, Gabriele Romeo and Giulio Santi.

Thanks go to the IEA Communications and Digital Office (CDO), particularly to Astrid Dumond, Isabelle Nonain-Semelin, Lucile Wall, Poeli Bojorquez, Jon Custer and Naomi Morduch Toubman. Nicola Clark carried editorial responsibility.

Valuable inputs on satellite and remote sensing data were provided by the International Methane Emissions Observatory (IMEO), the World Bank Global Gas Flaring and Methane Reduction Partnership, the Environmental Defense Fund, Carbon Mapper, Kayrros and GHGSat.
