CHART 1

Gross consumption of natural gas by OECD region

Total OECD indigenous production of natural gas increased by 4.4% in December 2019 compared with the same month last year. The increase in production was seen in the OECD Americas (+6.3% y-o-y¹) and OECD Asia Oceania (+4.5% y-o-y), due to increasing production in the United States (+8.2% y-o-y) and Australia (+4.7% y-o-y), respectively. On the other hand, OECD Europe experienced a decrease in production of 5.0% year-on-year, driven by a decrease in the Netherlands (-22.3% y-o-y). In Norway, after a few months with decreasing production due to maintenance and low gas prices, there was an increase of 1.0% (y-o-y). Over the year of 2019, total OECD production increased 6.1%, driven by the United States (+10.0% y-t-d²).

Total OECD imports (entries)³ were 1.8% higher in December 2019 compared with December 2018. Pipeline import decreased slightly (-0.3% y-o-y), while LNG imports grew by of 7.3% (y-o-y). In OECD Europe, total imports increased by 4.1% (y-o-y), driven by LNG imports (+34.1% y-o-y). Lower LNG imports were seen in both the OECD Americas (-29.3% y-o-y) and OECD Asia Oceania (-6.6% y-o-y). On a year to date basis, total OECD imports slightly increased by 0.9%, despite a significant growth in imports of LNG (+16.1%).

Total OECD exports (exits)³ experienced a 3.3% growth on a year-on-year basis, mainly driven by the OECD Americas (+19.6% y-o-y). Exports in OECD Europe fell by 4.8% (y-o-y) due to fewer exports to OECD countries. Compared to the same month last year, December 2019 pipeline exports were 3.2% lower, while LNG imports ramped up (+30.3% y-o-y). Compared to 2018, exports for total OECD were 2.8% higher in 2019, driven by a LNG exports increase (+25.4% y-t-d).

Total OECD gross consumption of natural gas grew by 2.4% in December 2019 compared to the same month last year, due to increases in both the OECD Americas (+4.4% y-o-y) and OECD Europe (+1.4% y-o-y). However, consumption declined by 4.3% (y-o-y) in OECD Asia Oceania, especially due to reduced consumption in Japan (-7.8% y-o-y), related with a shift towards renewable and nuclear energy. On a year-to-date basis, consumption in total OECD grew by 2.5%, a trend seen across all OECD regions. Increases in consumption in 2019 compared to 2018 were seen in the United States (+3.1%), Australia (+27.0%), Germany (+7.6%), and Spain (+14.5%).

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

3. Transit volumes are included. Trade amounts include intra-regional trade.

CHART 2

Indigenous production of natural gas by OECD region

CHART 3

Net trade of natural gas by OECD region¹

1. Trade amounts include intra-regional trade.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Mexico	October 2019 to December 2019
New Zealand	July 2019 to December 2019
Israel	January 2010 to December 2019

2) COUNTRY NOTES

A General Note	Starting with January 2011 data, the Imports and Exports no longer represent ultimate origins and destinations but are replaced by Entries and Exits corresponding the amounts that physically crossed the national boundaries of the country.
Australia	The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
Austria	Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
Belgium	Most recent data on origins of imports and final destinations of exports of LNG are the best estimates from the Belgian Administration based on available preliminary data.
Canada	Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
Finland	Finland is reporting stock levels as of January 2019. Therefore, there is a break in stock levels between December 2018 and January 2019.
Iceland	There is no natural gas data for Iceland, as there is neither production nor consumption.
Israel	The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central
Mexico	Observed gross inland deliveries of natural gas from January 2013 onwards are estimated.
Netherlands	Starting with January 2019, more complete trade data is reported based on better information from the GATE terminal. Revisions for historical series are pending. There is a break in stocks between December 2017 and January 2018 due to better compilation methods in the Dutch administration's new data reporting system.
United Kingdom	There is a break in stocks between March and April 2019 due to inclusion of stock held at LNG terminals. Beginning with January 2016, exits to the Isle of Man are reported under Non-Specified/Other. Prior to this date, exits to the Isle of Man were included in exits to Ireland.
