

Strengthening National Energy Information Systems in Africa

Webinar - 10 October 2024

Does your country have an energy statistics strategy?

What challenges does your government face in maintaining up-to-date and accurate energy data?

non-response from private sector

budget

funds

No strategies and policies in place to achieve this

Lack of financial and technical resources

la collecte de données la mobilisation des ressources

Data collection problems
No Central repository of data

digital infrastructure

What challenges does your government face in maintaining up-to-date and accurate energy data?

Resources

Lake of sources
Lake of accurate data

Manque de fonds pour la collecte des données

Trained personnel

budget to update baseline data

Lack of data form the different sectors and lack of tools

Problème de moyen et il y'a aussi l'accès à certaine zone du à l'insécurité

capacity and resources

What challenges does your government face in maintaining up-to-date and accurate energy data?

Forming a team to collect data
Lack of strategies

Bad leadership

Data collection problems
No Central repository of data

Lack of motivation

1. Limited resources
2. Capacity needs
3. Staffing levels
4. Coordination with other stakeholders

no response from stakeholders
budget
lack of strategy
trained personnel

Training of the right personnel

budget

What challenges does your government face in maintaining up-to-date and accurate energy data?

Capacity challenge (
Infrastructure personnel
Resources

Lack of awareness on
data statistics

Multiple institutions
generate energy data not
collected centrally

1. Funding
2. Capacity
3. Lack of Strategy
4. Lack of interest in using the data for policy making

Lack of resources and
funding

Funding

Fund

poor data culture

What challenges does your government face in maintaining up-to-date and accurate energy data?

survey for energy consumption

Coordination en interne inexistant

Energy statistics roadmap framework

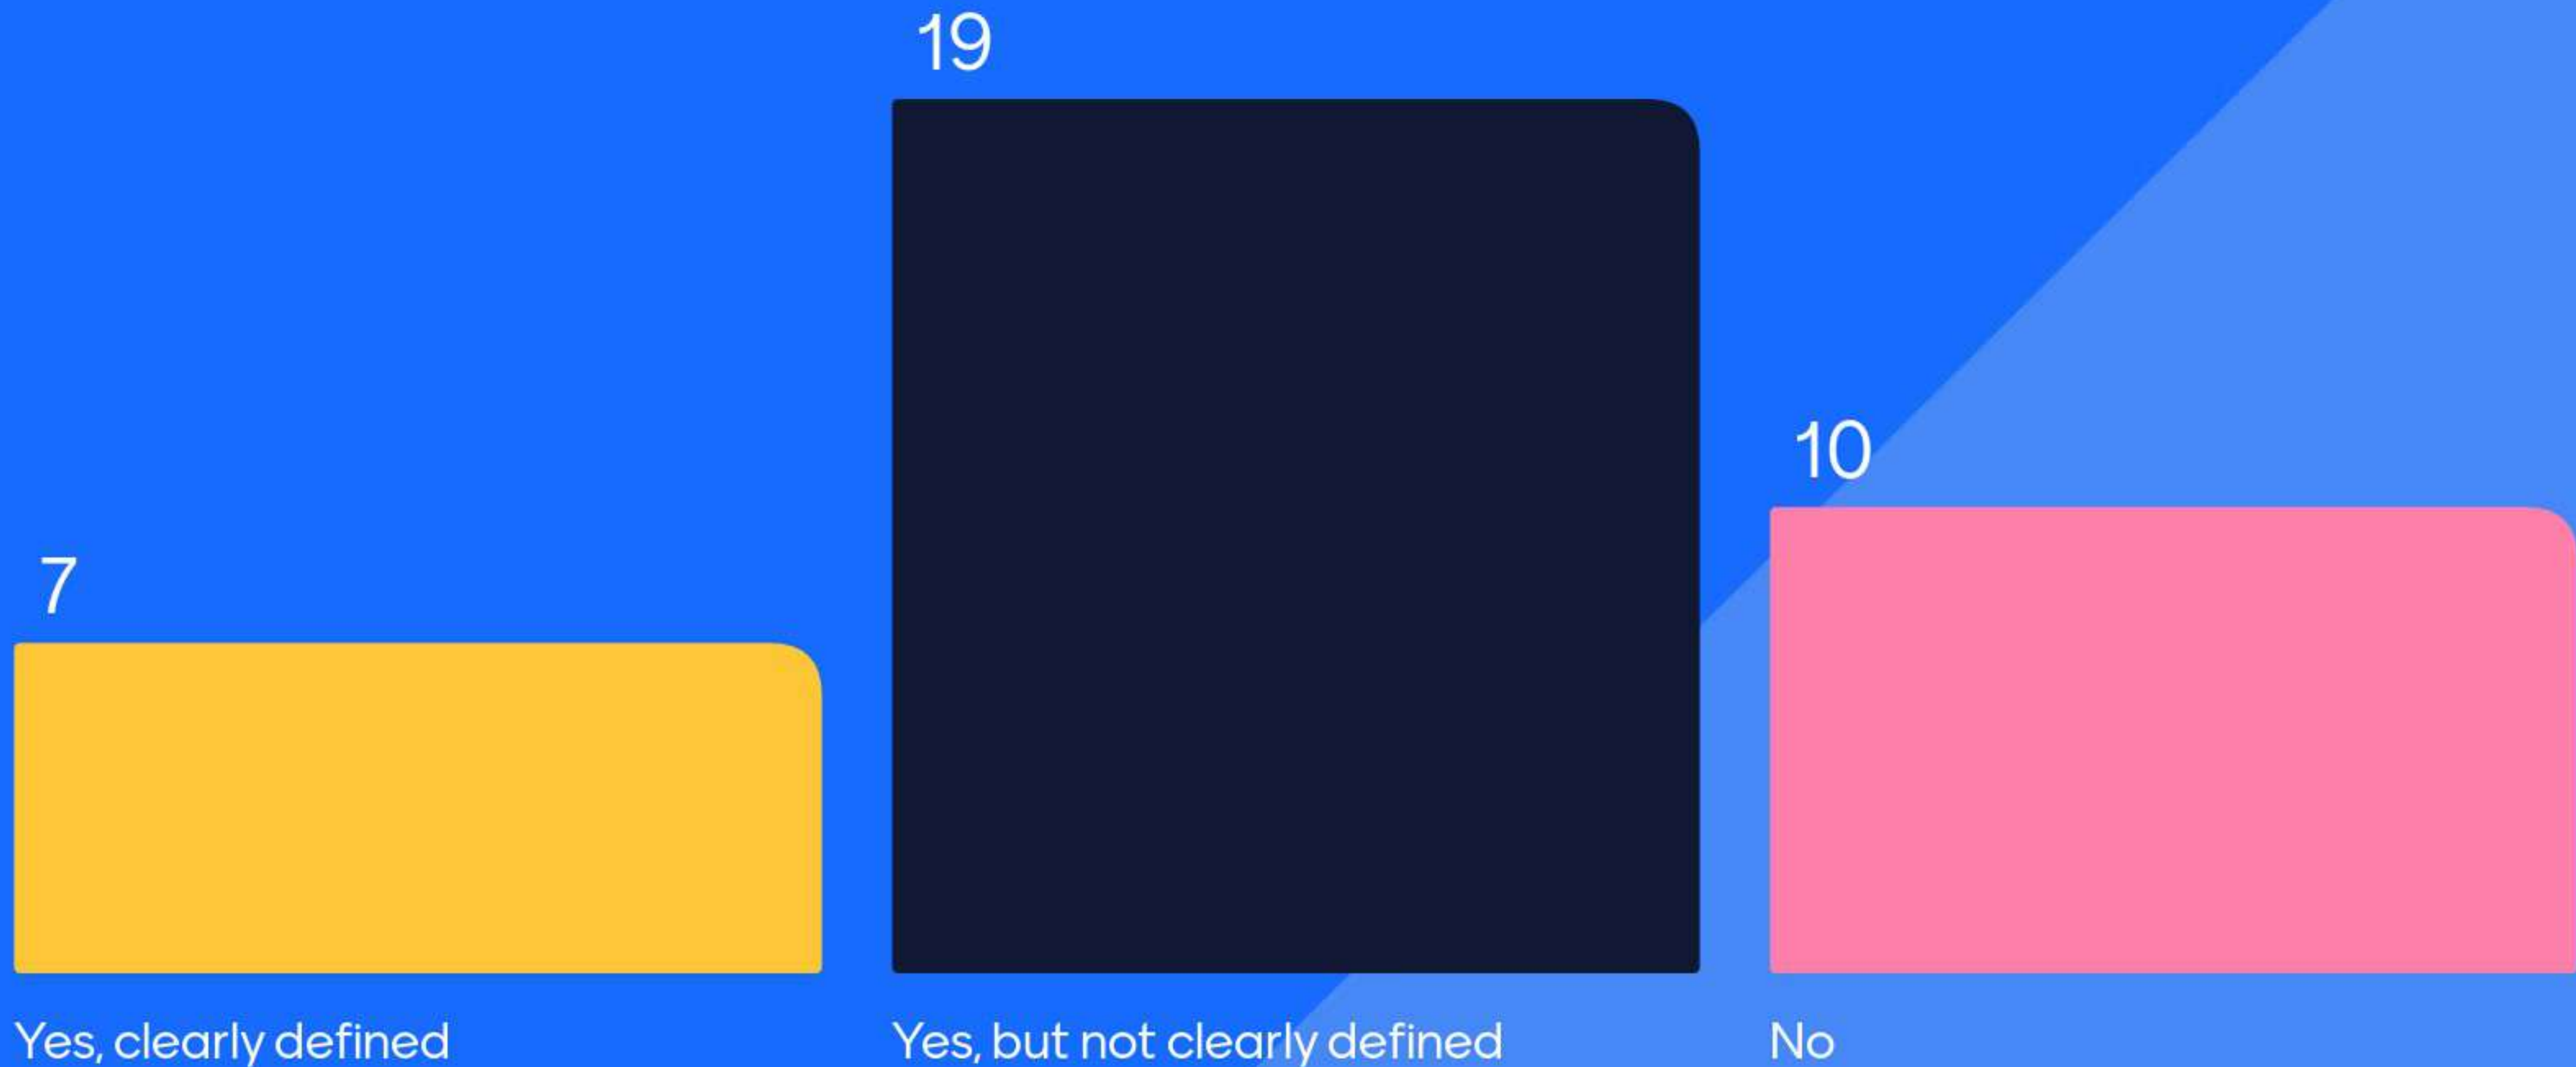

What drives the development of energy statistics in your country?

59 responses

Do you have a process to identify data collection priorities?

Are core energy statistics funded by the national administration?

8
Yes, fully funded

16
Yes, partially

12
No

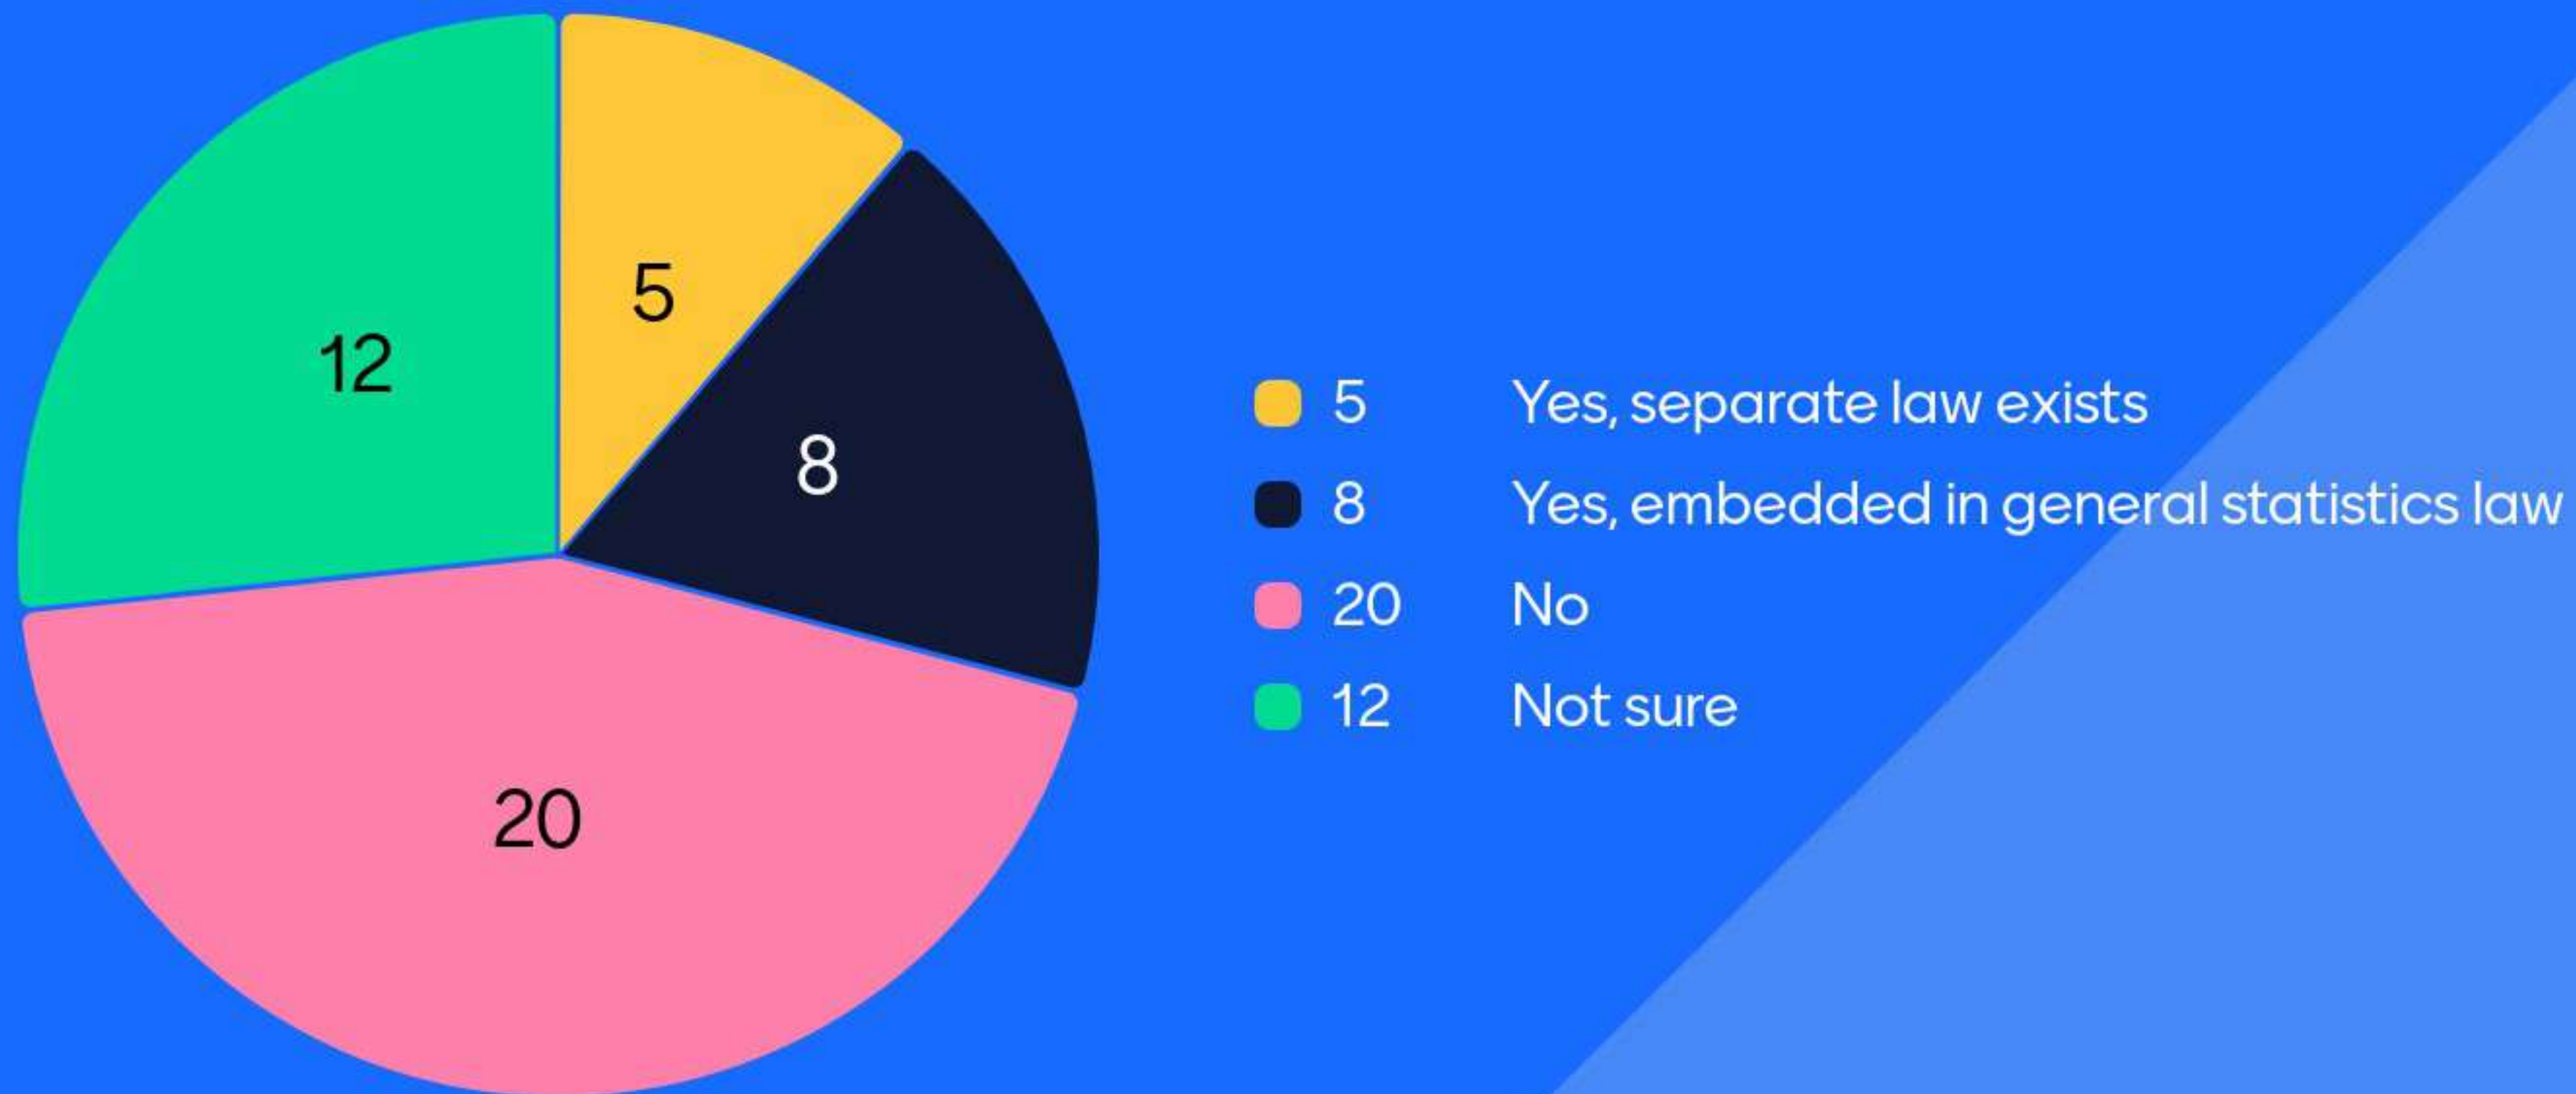

6
I don't know

Is there a regulatory framework for energy statistics (e.g. Energy Statistics Act or law)?

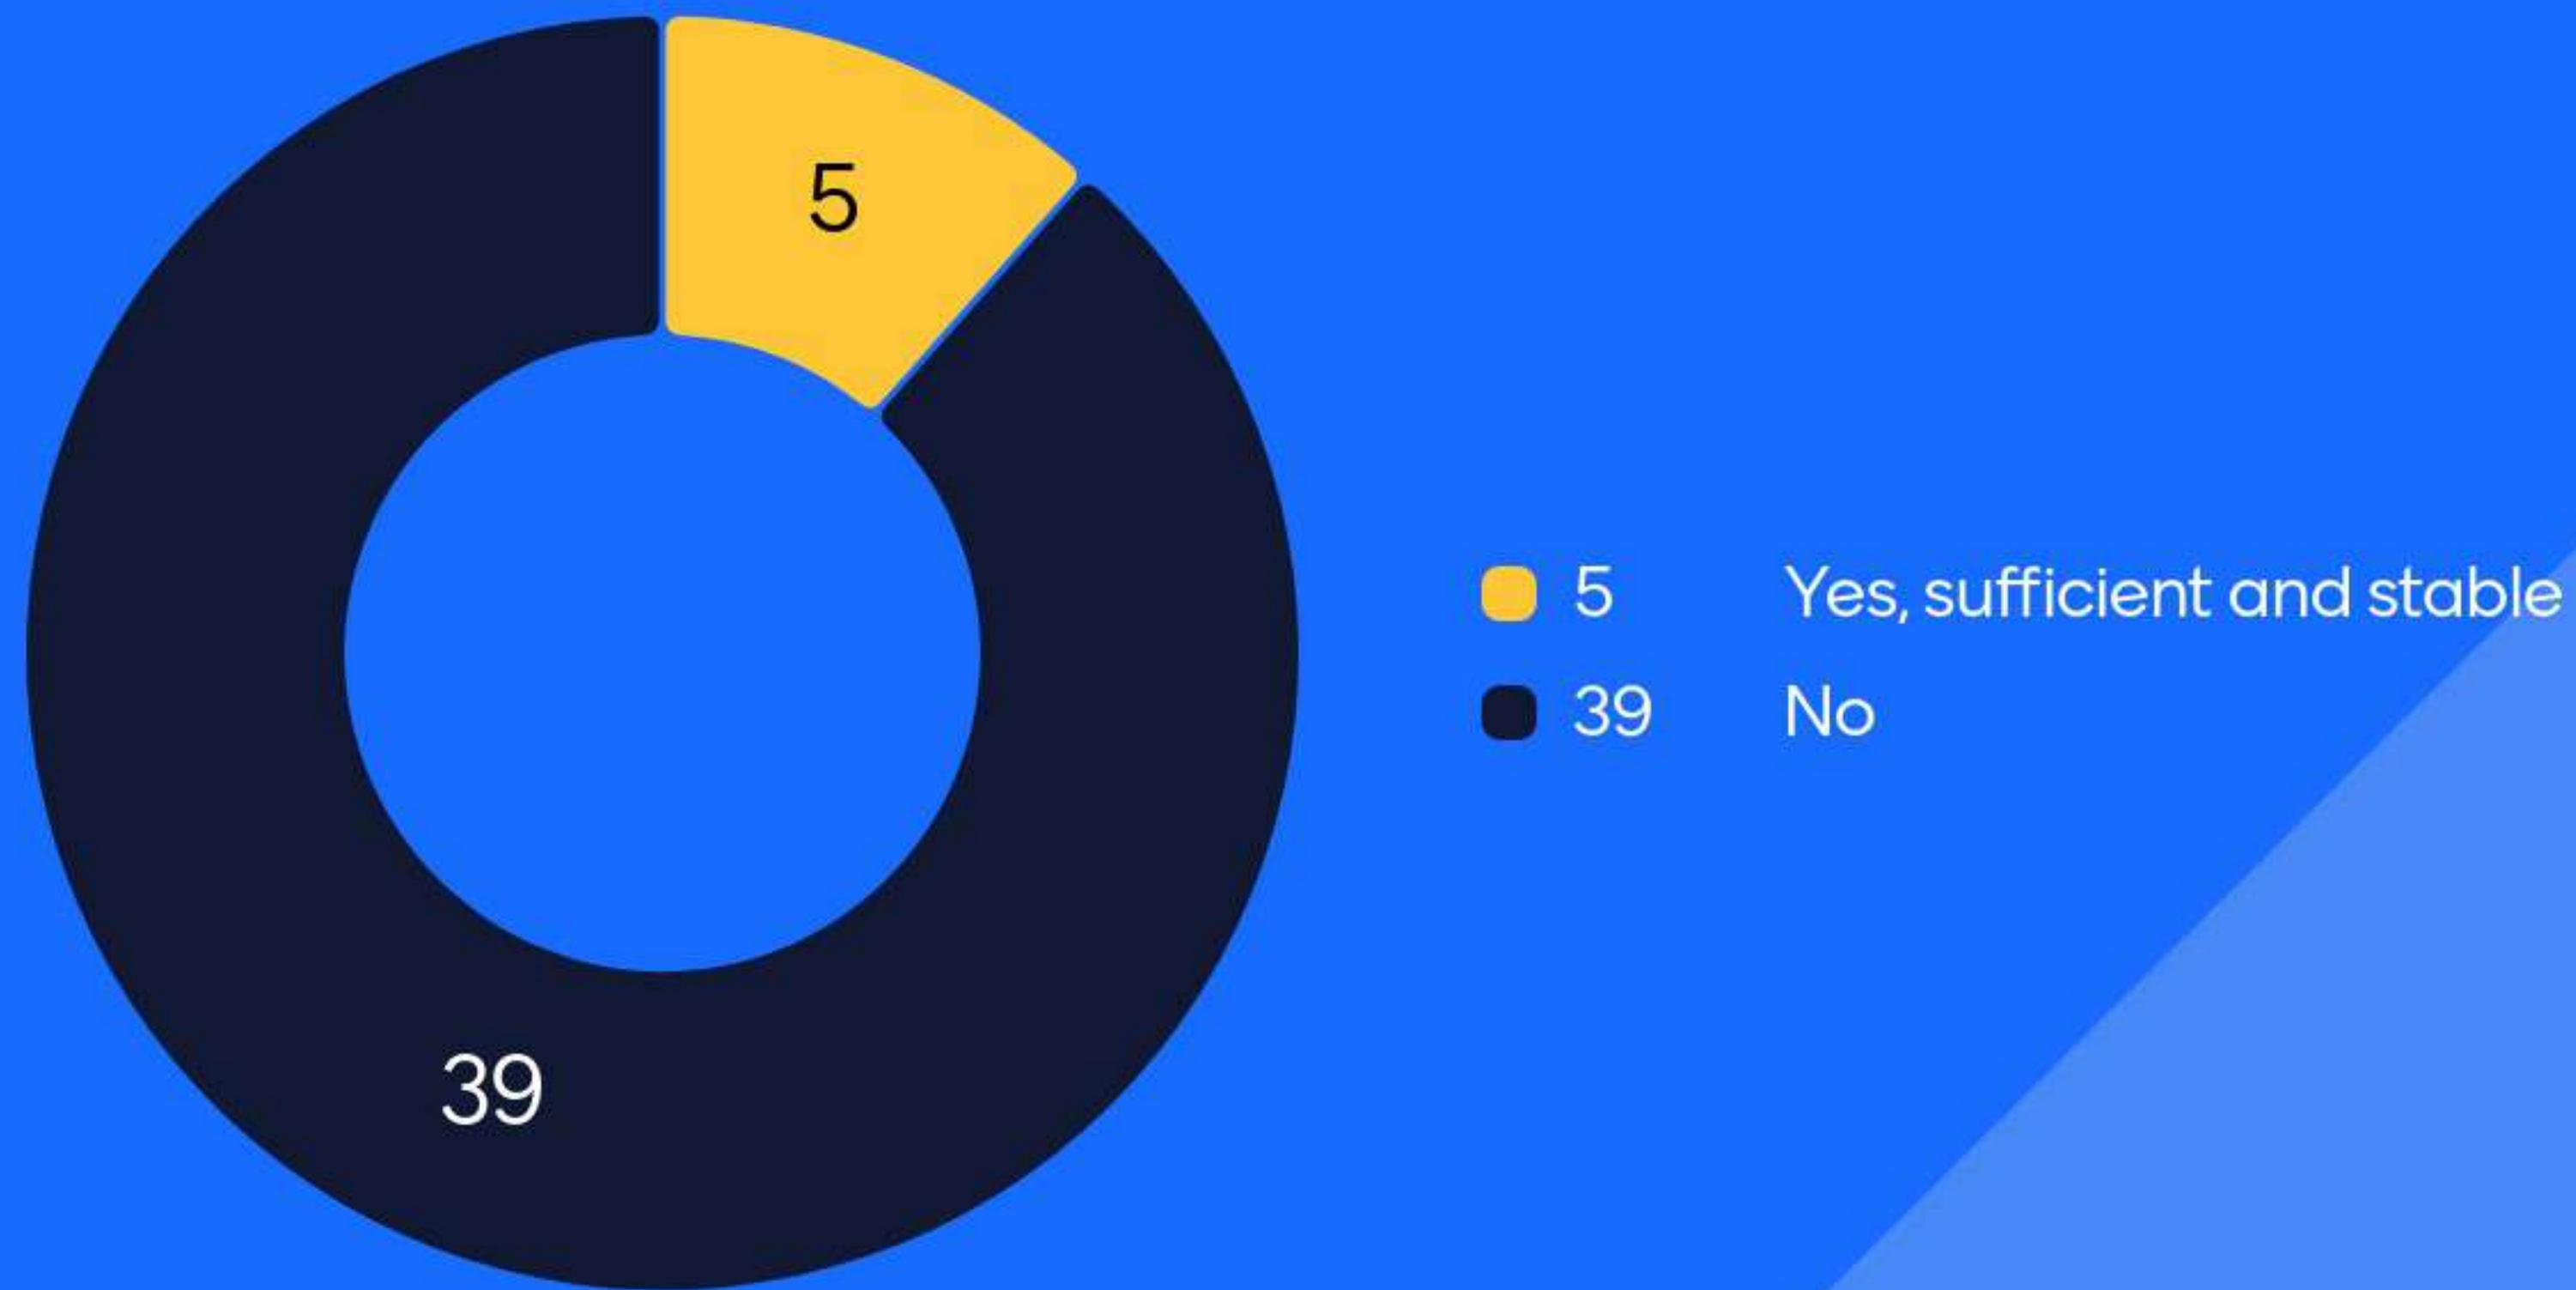

Is there an entity responsible for coordinating the national energy information system?

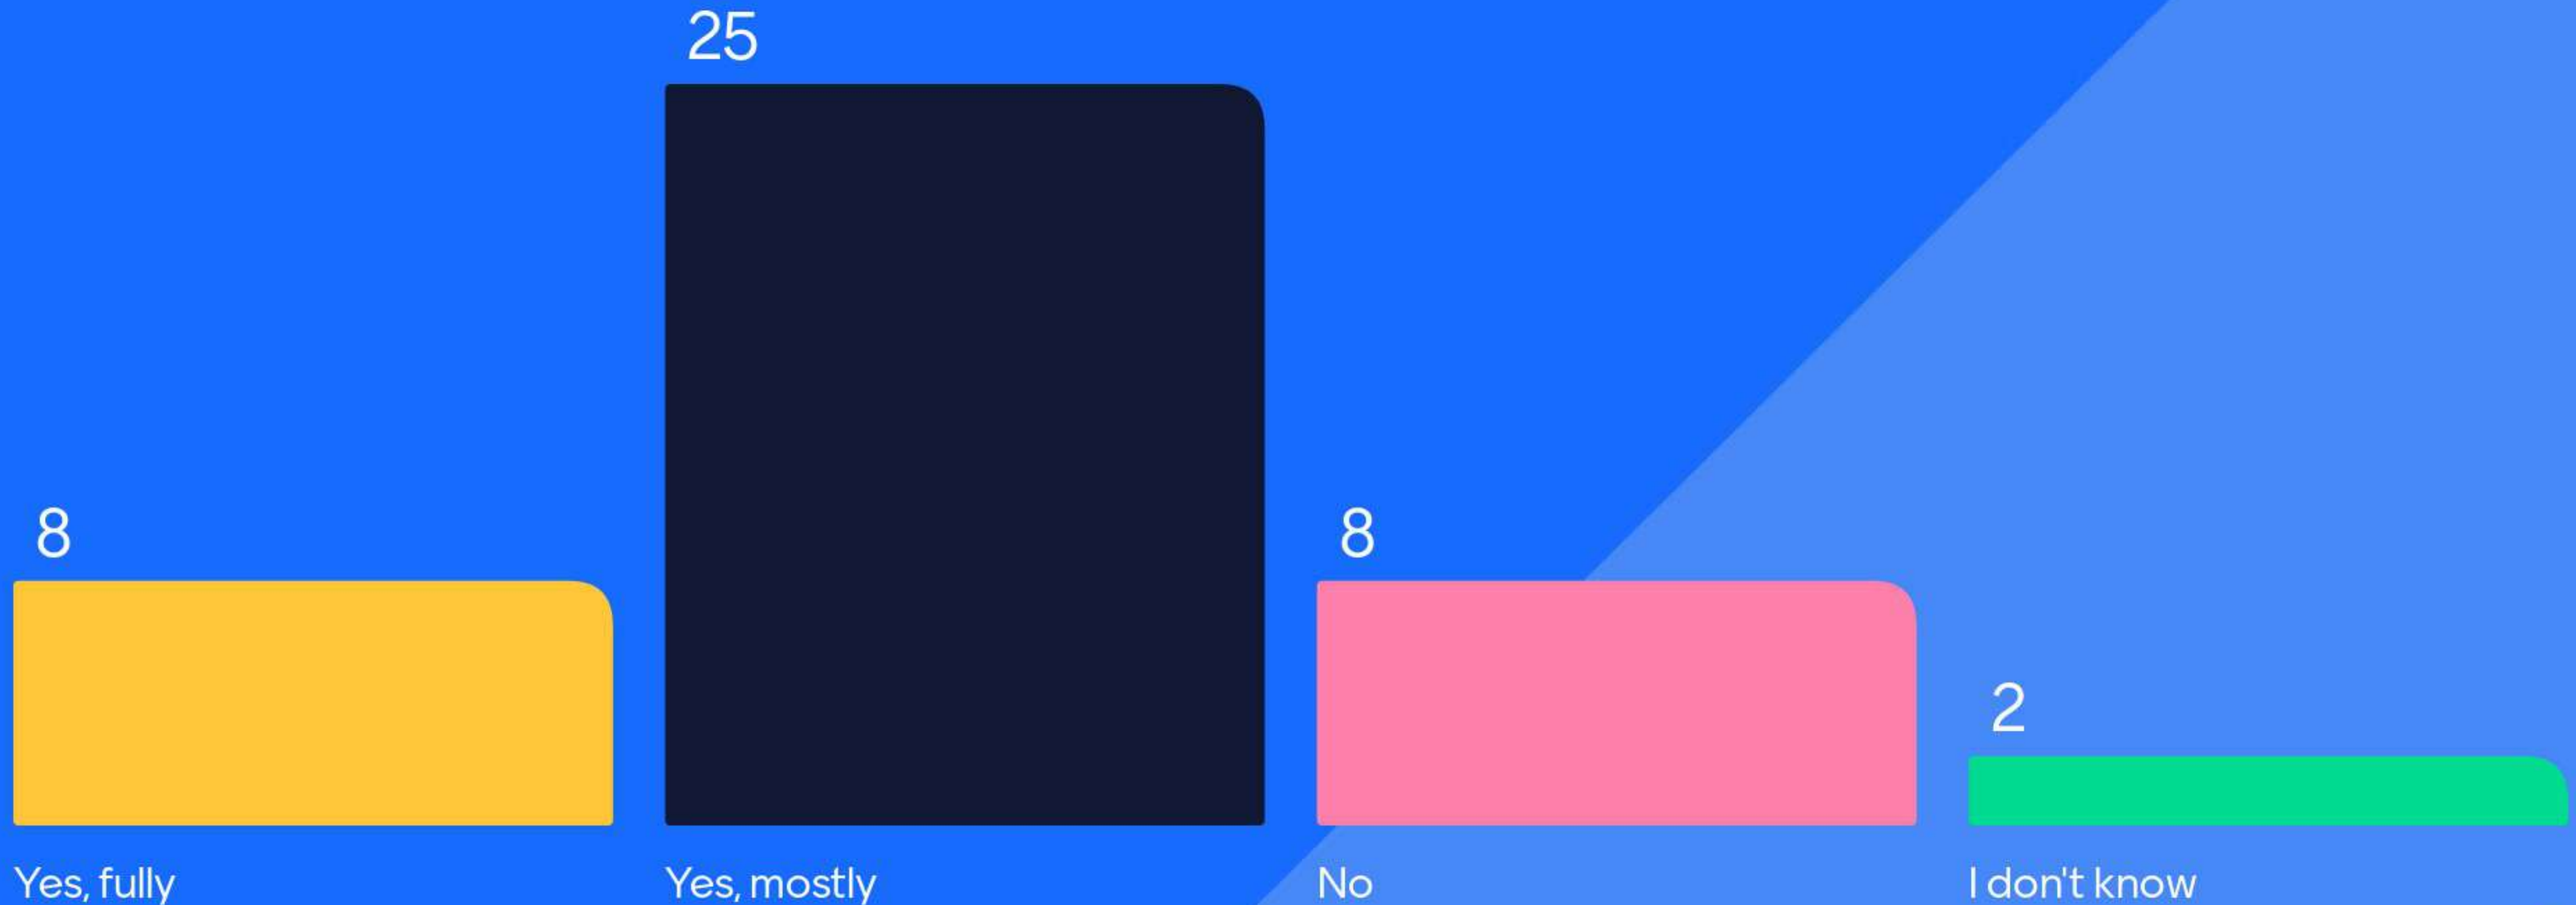

Are the available resources (human, technical and financial) sufficient and stable over time ?

Do all data collections follow documented methodologies and standards?

Are energy statistics of your country easily findable and accessible to users ?
