

Global Gas Markets

Key trends and implications for Latin America

Monday, 11 July 2022

16:00 – 17:30 CEST

Zoom Webinar

International
Energy Agency

iea

Background

Quarterly, the International Energy Agency releases a Gas Market Report, featuring a detailed review of gas supply and demand fundamentals, an analysis of recent seasonal developments in global gas markets, and a near-term outlook for the upcoming months. In the Gas Market Report Q3-2022, the IEA makes a comprehensive revision of how gas markets have responded to the continued pressure put by Russia's invasion to Ukraine and the effects this has had on energy prices and consumption patterns.

With a focus on Latin America, this webinar will showcase the takeaways of our most recent edition of the Gas Market Report and will bring together policymakers from the region to discuss the local impacts triggered by the energy crisis and how governments have coped with the changing gas landscape and managed uncertainty.

Agenda

Monday, 11 July 2022
