

Acknowledgements

This report was prepared by the Energy Technology Policy Division and the Carbon Capture Utilisation and Storage Unit within the Directorate on Sustainability, Technology and Outlooks (STO) of the International Energy Agency. The study was designed and directed by Timur Gül (Head of the Energy Technology Policy Division).

The analysis and production of the report was coordinated by Samantha McCulloch (Head of the CCUS Unit). The modelling work was coordinated by Uwe Remme. The main contributors were Praveen Bains (geospatial analysis), Adam Baylin-Stern, Niels Berghout, Sara Budinis, Peter Levi (industry analysis), Raimund Malischek, Trevor Morgan (Menecon Consulting), and Dong Xu.

Other contributors were Adeola Awoyomi, Simon Bennett, Elizabeth Connelly, Araceli Fernandez Pales, Hana Mandova, Jose Miguel Bermudez Menendez, Leonardo Paoli, Andreas Schroeder, Jacopo Tattini, Jacob Teter, Tiffany Vass, Ciril Wakounig and Brent Wanner. Marina Dos Santos provided essential support.

Trevor Morgan carried editorial responsibility. Erin Crum was the copy-editor.

Mechthild Wörsdörfer, Director of STO, provided encouragement and support through the project. Valuable comments and feedback were provided by senior management and other colleagues within the IEA, in particular Keisuke Sadamori, Laura Cozzi, Laszlo Varro, Carlos Fernandez Alvarez, Paolo Frankl, Peter Fraser and Sara Moarif.

We are also grateful to Jad Mouawad, Head of the IEA Communications and Digital Office (CDO) and the following CDO colleagues for producing and disseminating the report: Jon Custer, Astrid Dumond, Tanya Dyhin, Merve Erdem, Grace Gordon, Christopher Gully, Maria Kyriacou, Jethro Mullen, Julie Puech, Rob Stone, Therese Walsh and Wonjik Yang.

The work could not have been achieved without the support provided by the United States Department of Energy and Japanese Ministry of Economy, Trade and Industry.

The analysis and findings in this report draw on strategic guidance, insights and data received during invaluable IEA events: an *ETP 2020* consultation meeting held in July 2019, and a workshop on the potential for CCUS technologies held in February 2020. The work also benefited from information and views provided by participants within the Technology Collaboration Programmes (TCPs) by the IEA (particularly the IEA Greenhouse Gas Programme (TCP on Greenhouse Gas Technologies)) which bring

together thousands of experts across government, academia and industry from 55 countries in order to accelerate energy technology innovation.

Many experts from outside the IEA provided input, commented on the underlying analytical work and reviewed the report. Their comments and suggestions were of great value. They include:

Florian	Ausfelder	DECHEMA
Silvian	Baltac	Element Energy
Thomas	Berly	ABT Consulting Pty Ltd
Christoph	Beuttler	Climeworks
Simon	Bittleston	Schlumberger
Herib	Blanco	University of Groningen
Peng	Bo	China University of Petroleum - Beijing
Javier	Bonaplata	ArcelorMittal
Jean-Paul	Bouttes	EDF
Mick	Buffier	Glencore Coal Technology Collaboration Programme on Greenhouse Gas R&D/IEAGHG
Keith	Burnard	Carbon180
Erin	Burns	Oxy Low Carbon Ventures
Al	Collins	Technology Collaboration Programme on Greenhouse Gas R&D/IEAGHG
James	Craig	U.S. Department of Energy
Jarad	Daniels	Pacific Northwest National Laboratory
Casie	Davidson	Nordic Energy Research
Bo	Diczfalusy	Technology Collaboration Programme on Greenhouse Gas R&D/IEAGHG
Tim	Dixon	Element Energy
Emrah	Durusut	Oxy Low Carbon Ventures
Ryan	Edwards	ADEME
Aicha	El Khamlichi	Exxon
Alessandro	Faldi	China University of Mining and Technology
Jingli	Fan	Chief Scientist of the Australian Federal Government
Alan	Finkel	U.S. Department of Energy
Sarah	Forbes	The Research Council of Norway
Fridtjof Fossum	Unander	Mercator Research Institute on Global Commons and Climate Change
Sabine	Fuss	Politecnico di Torino
Marta	Gandiglio	Technology Collaboration Programme on Greenhouse Gas R&D/IEAGHG
Monica	Garcia Ortega	Stiftung Wissenschaft und Politik
