

World Energy Outlook

Organised by IEA, Hosted by Nordic Energy Research

Wednesday, 9 November 2022, 13:15-14:15, Nordic Pavilion

The International Energy Agency (IEA)'s World Energy Outlook (WEO), which has appeared year by year since 1998, provides critical analysis and insights on trends in energy demand and supply, and what they mean for energy security, environmental protection and economic development. The IEA's flagship publication includes a comprehensive view of how the global energy system could develop in the coming decades, with an indispensable guide to the opportunities, benefits and risks ahead at this moment for clean energy transitions.

This event will showcase the latest findings from the WEO scenarios, highlighting the key choices, consequences and contingencies that lie ahead in the path of clean energy transition. It will also illustrate how the course of the energy system might be affected by changing some of the key variables, including the climate actions adopted by governments around the world.

Agenda	
Moderator	Christophe McGlade, Head of Energy Supply Unit, IEA
13h15-13h25	Keynote speech Dr Fatih Birol, Executive Director, IEA
13h25-14h00	High level remarks on the World Energy Outlook Speakers: <ul style="list-style-type: none">• H.E. Ms. Ruth Nankabirwa Ssentamu, Minister of Energy and Mineral Development, Uganda• H.E. Mr. Tarek El-Molla, Minister of Petroleum and Mineral Resource, Egypt• H.E. Mr. Salim Al Afi, Minister of Energy and Minerals, Oman
14h00-14h10	Q&A from the audience on the World Energy Outlook Christophe McGlade, Head of Energy Supply Unit, IEA
14h10-14h15	Wrap up by Moderator
