

Corrigendum: Energy Efficiency 2019

Issued: 18 novembre 2019

Link to report: <https://www.iea.org/reports/energy-efficiency-2019>

On page 4:

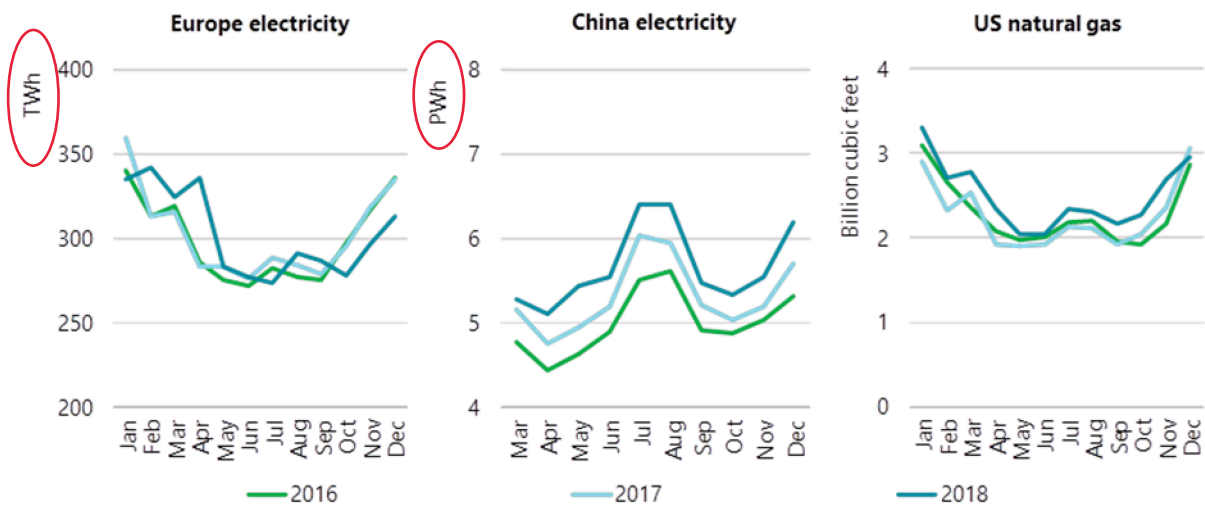

"Atasi Bhattacharjee **and** Marta Lovisolo provided essential research and statistical support."

On page 10:

"Levels of investment targeting efficiency have remained largely unchanged since 2014. At USD 240 billion, incremental efficiency investments across the buildings, transport and industry sectors were **less than 1% higher** in 2018 than in 2017, **but** still well below the levels required to capture the cost-effective opportunities available."

On page 20: **Figure 1.9 Europe and China monthly electricity consumption and US monthly gas consumption, 2016-18**

Units on the Europe electricity and China electricity parts of the chart **were changed** to be the correct units.

On page 25: **Figure 2.2 Contribution to global economic growth and final energy intensity improvement**

Colours in chart **were changed** to match country colours used in other charts.

On page 32: **Figure 2.8 Average fuel consumption and diesel market share of newly registered vehicles for selected European car markets, 2010-18**

Colours in chart **were changed** to match country colours used in other charts.

On page 35: **Figure 2.11 Average residential per capita floor area versus GDP in selected countries, 2010-15-18**

Colours in chart **were changed** to match country colours used in other charts.

On page 35: **Figure 2.12 Average household size versus GDP in selected countries, 2010-15-18**

Colours in chart **were changed** to match country colours used in other charts. Also **minor changes to marker sizes**.

On page 36: **Figure 2.13 Ownership of cooling devices and GDP per capita in selected countries, 2010-15-18**

Minor changes to marker sizes.

On page 43:

"At USD 240 billion, incremental efficiency investments across the buildings, transport and industry sectors were **less than 1%** higher in 2018 than 2017, **but** still well below the levels required to harness the cost-effective opportunities available."

On page 52: **Figure 3.7 Final energy use coverage of energy efficiency obligations, by country/region**

Colours in chart **were changed** to match country colours used in other charts.

On page 55:

"At USD 240 billion (IEA, 2019i), incremental efficiency investments across the buildings, transport and industry sectors were **less than 1%** higher in 2018 than the USD 236 billion invested in 2017 (IEA, 2018a)."

On page 56: **Figure 3.11 Global ESCO market growth 2015-18**

Colours in chart **were changed** to match country colours used in other charts.

On page 65: **Figure 3.14 Estimated steel production from scrap in electric arc furnaces, by region, 2010-17**

Colours in chart **were changed** to match country colours used in other charts.

On page 77: **Figure 4.3 Smart meter deployment, cost and penetration, 2000-17**

Colours in chart **were changed** to match country colours used in other charts.
