

**Corrigendum:** Breakthrough Agenda Report 2023

**Issued:** 15 Sept 2023

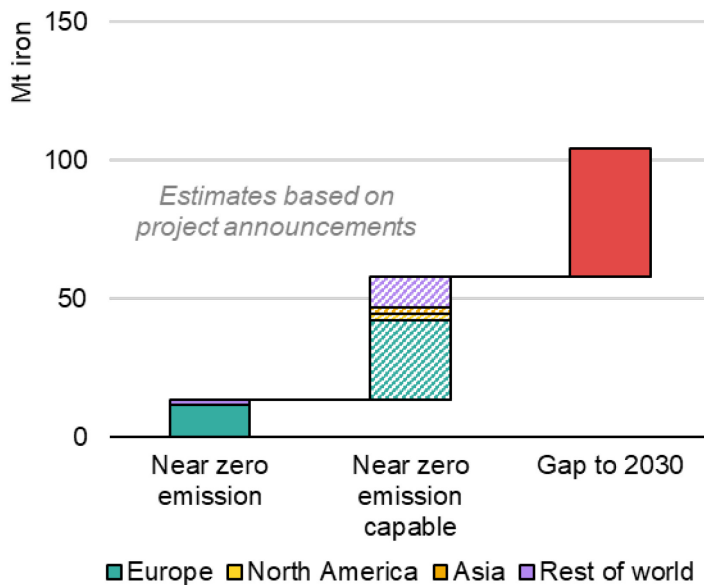

**Link to report:** <https://www.iea.org/reports/breakthrough-agenda-report-2023>

On page 95, replace figure

Replacing an old version of the chart, which focused on steel production not iron production and included an incorrect range.

With updated figure:

On page 151, add a hyperlink

Include a hyperlink to an updated report on the agriculture breakthrough

Our updated recommendations are based on the priorities emerging from a detailed science-based analysis of the seven technological areas and approaches in an underlying report by the CGIAR titled "**Achieving agricultural breakthroughs: A deep dive into seven technological areas and approaches**", henceforward called the CGIAR report.
