

Climate Resilience for Energy Security

Co-organised by International Energy Agency (IEA)
and International Atomic Energy Agency (IAEA)

Monday, 14 November 2022, 09:00-10:00, Atoms4Climate Pavilion

The International Energy Agency (IEA) releases a report “Climate Resilience for Energy Security” to provide a comprehensive overview of climate change risks and impacts on the energy sector, and introduce effective measures for energy suppliers, consumers and authorities. It also aims to provide insights to investors by demonstrating that investment in climate resilience will bring long-term benefits through cost-benefit analyses.

This event will discuss the threats faced by the energy sector in the face of climate change, raising awareness of the significance of climate resilience for both energy supply and demand. The event will propose concrete measures to enhance climate resilience by energy suppliers, consumers and authorities, and encourage knowledge sharing and exchanging of best practices between governments, international organisations, academia, finance sector, and private sector.

Agenda	
<i>Moderator</i>	Luca Lo Re, Environment and Climate Change Analyst, IEA
09h00	Opening remarks
<i>Participation</i>	Mary Warlick, Deputy Executive Director, IEA Catherine Stewart, Ambassador for Climate Change, Government of Canada
09h15	Scene-setting presentation: IEA Climate Resilience for Energy Security
<i>Participation</i>	Jinsun Lim, Energy and Environment Policy Analyst, IEA
09h25	Panel discussion
<i>Speakers</i>	Marta Martínez Sánchez, Director of Climate Change, Iberdrola Marcelino Madrigal, Head of Energy Division, IDB Roberta Boscolo, Scientific Officer Climate and Energy, WMO Brianna Lazerwitz, Energy Economist, IAEA
09h50	Q&A & Moderator’s wrap-up summary
