

Monthly Electricity Statistics

Documentation (2025 edition)

International
Energy Agency

iea

INTERNATIONAL ENERGY AGENCY

The IEA examines the full spectrum of energy issues including oil, gas and coal supply and demand, renewable energy technologies, electricity markets, energy efficiency, access to energy, demand side management and much more. Through its work, the IEA advocates policies that will enhance the reliability, affordability and sustainability of energy in its 31 member countries, 11 association countries and beyond.

This publication and any map included herein are without prejudice to the status of or sovereignty over any territory, to the delimitation of international frontiers and boundaries and to the name of any territory, city or area.

IEA member countries:

Australia
Austria
Belgium
Canada
Czech Republic
Denmark
Estonia
Finland
France
Germany
Greece
Hungary
Ireland
Italy
Japan
Korea
Lithuania
Luxembourg
Mexico
Netherlands
New Zealand
Norway
Poland
Portugal
Slovak Republic
Spain
Sweden
Switzerland
Republic of Türkiye
United Kingdom
United States

The European Commission also participates in the work of the IEA

IEA association countries:

Argentina
Brazil
China
Egypt
India
Indonesia
Morocco
Singapore
South Africa
Thailand
Ukraine

 - OECD Member Countries 9**
 - Selected Association countries and other non-OECD Economies 16**

Principles and definitions

The IEA's Monthly Electricity Statistics (MES) provides timely electricity production and trade data for member countries of the Organisation for Economic Co-operation and Development (OECD). It provides electricity production data for a selection of other economies. These additional countries are not included in the regional groupings.

The main source of MES data is the Monthly Electricity Questionnaire. The questionnaire is a monthly survey covering OECD countries for which national administrations submit data to the IEA Secretariat. Data are collected on a monthly minus 2 (M-2) basis, the so-called MES month. The questionnaire can be downloaded from the IEA website here: https://iea.blob.core.windows.net/assets/492832fd-adfb-4420-88b5-601397a67060/MonthlyElec_v7.0.4.xlsm

Data are checked and assessed every month by the IEA Secretariat before being published. The latest publishing schedule can be found on the IEA MES page here: <https://www.iea.org/data-and-statistics/data-product/monthly-electricity-statistics>

General Notes

Electricity production and trade data are reported at the individual country level as well as in organisational and regional groupings. These groupings include: OECD Total, OECD Americas, OECD Asia Oceania, OECD Europe and IEA Total.

The units are gigawatt hours (GWh).

Definitions are consistent with the IEA's "Electricity and Heat" annual questionnaire. Statistics are subject to revision on official receipt of the annual questionnaire from national administrations or on improved data becoming available.

To enable timely publication, the IEA may supplement national statistics with data from other sources. Where adequate information is not available from external sources, estimates have been made by the IEA. Methodological notes are provided in individual country pages or the country notes section below.

Note that historic data are often recalculated. Therefore, the latest publication should be considered the most accurate. Regional and organisational summaries may also change based on country recalculations.

Monthly electricity data is adjusted proportionately to maintain consistency with the most recent annual data for each generation source.

Publication and further information

This data is released in the middle of each month onto the IEA's Website:

- Data visualisation: <https://www.iea.org/data-and-statistics/data-tools/monthly-electricity-statistics>
- Data download: <https://www.iea.org/data-and-statistics/data-product/monthly-electricity-statistics>

The data is made available for download in csv format. It includes data from January 2010 for OECD countries and from January 2015 for other countries.

Data should not be reproduced for publication without permission of the IEA.

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website: www.iea.org/terms.

For inquiries please contact ces@iea.org

Basic definitions

Balance

Balance	Definition
Net Electricity Production	The gross electricity production less the electrical energy absorbed by the generating auxiliaries and the losses in the main generator transformers. This is calculated as the sum of the electricity production by energy source (Nuclear + Conventional thermal + Hydro + Wind + Solar + Geothermal + Other Renewable Sources + Not Specified).
Total imports / Exports	Amounts of electricity that have crossed political boundaries of the country, whether customs clearance has taken place or not. If electricity is transited through a country, the amount should be reported as both an import and an export.
Used for pumped storage	Electricity consumed by pumping water into a reservoir in mixed and pure pumped storage hydro plants
Distribution losses	All losses due to transport and distribution of electrical energy. Losses in transformers which are not considered as integral parts of the power plants are also included
Final consumption (calculated)	Electricity available (calculated as: Indigenous production + Imports - Exports - used for pumped storage - Transmission and distribution losses)

Product

Product	Definition
Nuclear	Energy released by nuclear fission or nuclear fusion.
Total Combustible Fuels	Electricity production by combusting fuels capable of igniting or burning, i.e. reacting with oxygen to produce a significant rise in temperature
Coal, Peat and Manufactured Gases	Production from primary coal, coal products, peat and peat products, oil shale and oil sands, and manufactured gas (such as coke-oven gas, blast-furnace gas and gas works gas).
Oil and Petroleum Products	Production from crude oil, natural gas liquids, refinery feedstocks, and petroleum products (such as refinery gases and fuel oil).
Natural gas	Production from natural gas (including gas distributed via the grid that may contain very little amounts of blended other gases).
Combustible renewables	Production from combustible renewables (such as solid biofuels, biogases, liquid biofuels, municipal renewable waste).
Other Combustible Fuels (non-renewables)	Production from all other combustible fuels (such as non-renewable industrial and municipal solid waste).
Hydro	Electricity generated from the potential and kinetic energy of water converted into electricity in hydroelectric plants. Pumped storage should be included.
Wind	Electricity generated in on-shore and off-shore wind turbines using kinetic energy of wind.

Product	Definition
Solar	Electricity generated using solar radiation. Includes thermal and photovoltaic.
Geothermal	Electricity generated using heat emitted from within the earth's crust, usually in the form of hot water or steam.
Other Renewables	Electricity generated from tide, wave, ocean and other non-combustible sources
Total Renewables	Includes electricity generation from Hydro, Wind, Solar, Geothermal, Other Renewables and Combustible Renewables
Not Specified	Not elsewhere reported electricity generation.

Regional Groupings

OECD Total includes Australia, Austria, Belgium, Canada, Chile, Colombia, Costa Rica, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Korea, Latvia, Lithuania, Luxembourg, Mexico, the Netherlands, New Zealand, Norway, Poland, Portugal, Spain, Sweden, the Slovak Republic, Slovenia, Switzerland, Republic of Türkiye, the United Kingdom and the United States.

Israel is not included in this report.

OECD Americas includes Canada, Chile, Colombia, Costa Rica, Mexico and the United States.

OECD Asia Oceania includes Australia, Japan, Korea and New Zealand.

OECD Europe includes Austria, Belgium, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Norway, Poland, Portugal, the Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Republic of Türkiye and the United Kingdom.

IEA includes all countries included in *OECD Total* except Chile, Iceland, Latvia and Slovenia.

Country notes

OECD Member Countries

Australia

Excludes the overseas territories.

Monthly data are adjusted according to data submitted on a fiscal year basis beginning 1st of July and ending 30th of June.

Monthly reporting for data prior to July 2016 does not include production from large-scale solar production, therefore it is estimated by the IEA Secretariat. Data reported after July 2016 includes rooftop solar, except for Western Australia and Northern Territory.

Monthly reporting did not include production from pumped hydro, mixed hydro, hydro used for pumped storage, solar thermal nor transmission and distribution losses, therefore they are estimated by the IEA Secretariat.

Austria

Monthly reporting does not include production from geothermal and solar, therefore it is estimated by the IEA Secretariat based on annual submission since January 2003.

The last coal power plant in Austria closed in April 2020. From then on, coal production comes from autoproducer CHP plants and is mainly from coal products.

Belgium

The last main activity coal power plant closed in March 2016. From then on, coal production in Belgium comes mainly from manufactured gases.

Canada

Continually increasing levels of wind and solar coverage since January 2017 until December 2018.

New methodology and higher coverage since April 2019 (starting with MES January 2019 publication). Reviewed data back to January 2016.

Monthly reporting does not include the breakdown for conventional thermal production, transmission and distribution losses or hydro used for pumped storage, therefore it is estimated by the IEA Secretariat.

Chile

Chile was added to the MES report in February 2011. Historical data are available only from January 2006.

Colombia

Colombia was included in the MES Report in November 2020 becoming an OECD Member Country in April 2020.

Monthly reporting includes data from January 2014 onwards.

Monthly submissions are presented in gross values. The values in the MES report are net and are estimated by the IEA Secretariat.

Monthly submissions only include autoproduction that is injected back into the grid. Other autoproduction is estimated by the IEA Secretariat. This includes autoproduction from the hydrocarbon sector.

Costa Rica

Costa Rica joined the OECD in May 2021. Data for Costa Rica are available starting in January 2020.

Czech Republic

Monthly reporting did not include production from other non-combustible fuels, therefore it was estimated by the IEA Secretariat based on annual submission from January 2004 until December 2008.

Denmark

Excludes the Faroe Islands and Greenland.

Estonia

Estonia was added to the MES report in April 2011. Historical data are available only from January 2006.

Monthly reporting does not include the breakdown for conventional thermal production, therefore it is estimated by the IEA Secretariat.

Monthly reporting does not include transmission and distribution losses or hydro used for pumped storage, therefore it is estimated by the IEA Secretariat.

Finland

Peat power production is included in other combustible fuels.

Not elsewhere reported electricity generation is estimated based on annual submissions.

France

Includes Monaco. Since January 2018 it includes the French overseas territories: French Polynesia, Guadeloupe, Guyane, Martinique, New Caledonia, Reunion, Saint Pierre and Miquelon.

Monthly reporting does not include production from other non-combustible fuels, other renewable sources and not specified therefore they are estimated by the IEA Secretariat based on annual submissions.

Germany

Not elsewhere reported electricity generation is estimated from monthly submissions of production from main electricity producers.

Greece

Monthly reporting does not include production from other combustible fuels, therefore it was estimated by the IEA Secretariat based on annual submission.

Hungary

Net production was estimated from monthly submission of gross production through December 2015.

Not elsewhere reported electricity generation is estimated based on annual submissions.

Iceland

There are no notes for this country.

Ireland

Monthly reporting does not include solar production, therefore it was estimated by the IEA Secretariat based on annual submission.

Italy

Includes San Marino and the Vatican.

Monthly reporting does not include distribution losses, therefore it is estimated by the IEA Secretariat based on annual submissions.

Japan

M-3 data is not available for Japan so the latest month is estimated by the IEA Secretariat.

Monthly data are adjusted according to data submitted on a fiscal year basis beginning 1st of April and ending 31st of March. Annual data shown are the sum of months and may differ from publications referring to Japanese fiscal year (April-March).

Since April 2017 electricity generation from biomass is reported in the coal category if it's co-fired with this fuel, and in combustible renewables if the combustion is mono-fuel.

Since April 2017 coal category included coal, bituminous mixture, natural gas (other than LNG), coke-oven gas and city gas.

Hydro generation includes plants with capacity of 1MW and over.

Monthly electricity production data does not include trade data.

Monthly reporting did not include transmission and distribution losses, therefore they are estimated by the IEA Secretariat.

Korea

Monthly reporting did not include production from other combustible fuels (non-renewables), hydro used for pumped storage nor transmission and distribution losses, therefore they are estimated by the IEA Secretariat.

Latvia

Latvia was added to the MES report in January 2017. Historical data are available only from January 2010.

The strong hydro performance in 2017-2018 agrees with historical patterns and is due to environmental reasons, most notably the increased inflow in the Daugava River.

Monthly reporting does not include electricity production from distribution losses, therefore they are estimated by the IEA Secretariat.

Lithuania

Monthly data available since January 2008.

Luxembourg

The Twinerg CCGT plant has been idle since April 2016 and was decommissioned in October 2016. This has caused decreased production from combustible fuels and, consequently, a decrease in exports.

Mexico

Data are collected from the Centro Nacional de Control de Energía (CENACE).

Monthly reporting of electricity production does not include autoproducers, therefore it is estimated by the IEA Secretariat based on annual submission.

Installations under 500 kW are not included in the reporting data, therefore it is estimated by the IEA Secretariat based on annual submission.

Electricity trade data is estimated by Mexico administration. It may be inconsistent with US data flows. This data is currently under review.

The data source changed in January 2020 and the data processing was then updated so that data is consistent in the whole set.

Monthly reporting does not include the breakdown for conventional thermal production, therefore it is estimated by the IEA Secretariat.

Monthly electricity production data does not include trade data, transmission and distribution losses or hydro used for pumped storage which are estimated by the IEA Secretariat.

Netherlands

Excludes Suriname and the territory of the Former Netherlands Antilles.

There was no nuclear production in May and June 2017 due to plant maintenance. The nuclear production resumed in July 2017.

New Zealand

Monthly reporting did not include production from not specified source nor transmission and distribution losses, therefore they are estimated by the IEA Secretariat.

Monthly submissions only include main electricity producers, which supposes a 95% coverage. The rest of the electricity generation is estimated by the IEA Secretariat based on the annual submissions.

Norway

Monthly reporting does not include electricity production from coal, oil and not specified, therefore these are estimated by the IEA Secretariat.

Natural gas figures since January 2020 are confidential and are reported as other combustible fuels.

Poland

Oil figures are confidential since January 2017 and are reported under coal.

Mixed hydro figures are confidential since January 2017 and are reported as pure hydro.

Monthly reporting excludes not specified electricity generation, therefore it is estimated by the IEA Secretariat based on annual submissions.

Portugal

Includes the Açores and Madeira since January 2015.

Slovak Republic

There are no notes for this country.

Slovenia

Slovenia was added to the MES report in April 2011. Historical data are available only from January 2010.

Spain

Includes the Canary Islands, Balear Islands, Ceuta and Melilla.

Monthly reporting does not include electricity production from other renewable sources or not elsewhere specified, therefore they are estimated based on annual submissions.

Sweden

Monthly reporting does not include electricity production from coal, therefore it is estimated by the IEA Secretariat based on annual submission since January 2000.

The last coal-fired power plant in Sweden closed in April 2020.

Switzerland

Excludes Liechtenstein.

Türkiye

Monthly reporting does not include transmission and distribution losses, therefore it is estimated by the IEA Secretariat.

United Kingdom

Monthly reporting does not include production from other renewable sources, therefore it is estimated by the IEA Secretariat.

United States

Includes the 50 States, the District of Columbia and Puerto Rico.

Electricity trade data has been estimated by the U.S. administration since July 2017. It may be inconsistent with the trade data from Mexico. This data is currently under review.

Selected Association countries and other non-OECD Economies

Argentina

Starting from 2023, monthly data is submitted by Argentina's Secretaria de Energía. Previously, data was collected from CMMESA.

Brazil

Monthly data is collected from Brazil's power trade chamber CCEE.

Monthly production data only include main electricity producers. The rest of the electricity generation is estimated by the IEA Secretariat based on the annual submissions.

Monthly reporting includes Paraguayan hydro production from the Itaipu binational dam. The Paraguayan share is estimated by the IEA Secretariat then discounted from the total Brazilian hydro production.

Bulgaria

Monthly data is collected on the Eurostat Database.

China

Monthly data is collected from the National Bureau of Statistics.

Raw monthly production data is collected from the National Bureau of Statistics in gross values. All the data in the MES Report is presented in net values, therefore Chinese net production data is calculated based on IEA Secretariat estimates.

Raw production data for the months of January and February is reported combined. The IEA Secretariat have estimated production data for these two months based on annual data and the FGE China Gas Monthly Report.

Monthly reporting did not include disaggregated production from combustible fuels nor production from geothermal and other renewables, therefore they are estimated by the IEA Secretariat.

Croatia

Monthly data is collected on the Eurostat Database .

Monthly reporting did not include production from solar, therefore it was estimated by the IEA Secretariat based on annual submission from January 2015 until December 2016.

From January 2016 onwards solar production was included in the monthly reporting.

Not elsewhere reported electricity generation is estimated based on annual submissions.

Cyprus

Note by Republic of Türkiye:

The information in this document with reference to “Cyprus” relates to the southern part of the Island. There is no single authority representing both Turkish and Greek Cypriot people on the Island. Republic of Türkiye recognises the Turkish Republic of Northern Cyprus (TRNC). Until a lasting and equitable solution is found within the context of the United Nations, Republic of Türkiye shall preserve its position concerning the “Cyprus issue”.

Note by all the European Union member states of the OECD and the European Union:

The Republic of Cyprus is recognised by all members of the United Nations with the exception of Republic of Türkiye. The information in this document relates to the area under the effective control of the Government of the Republic of Cyprus.

Monthly data is collected on the Eurostat Database.

Monthly reporting did not include transmission and distribution losses, therefore they are estimated by the IEA Secretariat.

India

Monthly data is collected from the Central Electricity Authority and the National Power Portal.

Raw monthly production data is collected from the Central Electricity Authority in gross values. All the data in the MES Report is presented in net values, therefore Indian net production data is calculated based on IEA Secretariat estimates.

Monthly data are adjusted according to data submitted on a fiscal year basis beginning 1st of April and ending 31st of March.

Monthly production data only include main electricity producers. The rest of the electricity generation is estimated by the IEA Secretariat based on the annual submissions.

Monthly reporting did not include production from other combustible fuels (non-renewables), therefore it is estimated by the IEA Secretariat.

Malta

Monthly data is collected on the Eurostat Database.

Monthly reporting did not include production from combustible renewables nor transmission and distribution losses, therefore they are estimated by the IEA Secretariat.

North Macedonia

Monthly data is collected on the Eurostat Database.

Monthly reporting did not include production from oil and petroleum products, therefore it is estimated by the IEA Secretariat.

Romania

Monthly data is collected on the Eurostat Database.

Monthly reporting did not include production from pumped hydro, mixed hydro, hydro used for pumped storage nor transmission and distribution losses, therefore they are estimated by the IEA Secretariat.

No geothermal value to be reported as the production level are too low to be accounted at a monthly scale.

Not elsewhere reported electricity generation is estimated based on annual submissions.

Serbia

Monthly data is collected on the Eurostat Database.

Monthly reporting did not include transmission and distribution losses, therefore they are estimated by the IEA Secretariat.
