

IEA Energy Statistics Course

October 9 - 11, 2023

Draft Agenda

Day 1

Time	Content	Presenter
Coal Module		
12:00 – 12:10	Welcome from the IEA	TBD
12:10 – 12:30	Coal <i>This session gives an overview of the recent trends in world coal production, consumption, and trade, including its role in electricity generation; there is also key guidance on how to report data in the joint annual coal questionnaire. Participants will learn about coal classifications, and how to create a coal balance.</i>	TBD
12:30 – 12:45	Q&A	
5min break		
12:50 – 13:30	Dedicated exercise session	TBD
5min break		

Renewables Module		
13:35 – 13:55	Renewables <i>This session gives an overview of the latest trends in renewable sources of energy. The four classifications of renewable and waste sources will be explained, including a focus on different types of solid biofuels. Participants will learn about the different aspects of creating a renewable balance, and how to report data in the joint annual renewables and waste questionnaire.</i>	TBD
13:55 – 14:10	Q&A	
5min break		
14:15 – 14:55	Dedicated exercise session	TBD
5min break		

Introduction to Hydrogen Data Collection Module		
15:00 – 15:15	Introduction to Hydrogen Data Collection <i>Given the increasing importance that Hydrogen is making within the energy domain, this short introductory session will explain some of the key concepts and data flows that countries should seek to collect to help produce a hydrogen balance. Links to ammonia and e-fuels will also be discussed.</i>	TBD
15:15 – 15:30	Q&A	

Day 2

Natural Gas Module

12:00 – 12:20	Natural Gas <i>This session gives an overview of the recent trends in gas production and consumption in the energy mix, key concepts in gas statistics and fundamental guidance on reporting data into the joint annual gas questionnaire. Participants will learn about the gas supply chain and commodity flow, taking into account the special considerations for reporting trade, for example.</i>	TBD
12:20 – 12:35	Q&A	
5min break		
12:40 – 13:25	Dedicated exercise session	TBD
5min break		

Oil Module

13:30 – 13:50	Oil <i>This session gives an overview of the recent trends in oil supply and demand, key concepts in oil statistics and fundamental guidance on reporting data into the joint annual oil questionnaire. Participants will learn the characteristics that define oil and follow the various elements in the supply chain, from oil production to final consumption, that comprise the oil balance.</i>	TBD
13:50 – 14:05	Q&A	
5min break		
14:10 – 14:55	Dedicated exercise session	TBD
5min break		

Energy Demand and End-Use Data Module

15:00 – 15:20	Energy Demand and End-Use Data <i>The session will describe the key data needed for a good representation of the demand-side of the energy system, including: power and transformation, industry, transport, buildings and other sectors – typically requiring dedicated data collection at national level. Demand-side data are key to the design of a complete and accurate energy balance. The session will also show the benefits of collecting detailed end-use data for each sector, as a preliminary step to developing efficiency indicators to inform and monitor sectoral policies.</i>	TBD
15:20 – 15:30	Q&A	

Day 3

Electricity Module

12:00 – 12:20	Electricity <i>This session gives an overview of the latest trends in world electricity generation and consumption. The distinction between primary and secondary electricity sources, as well as between main activity and auto producer plans will be explained, as will the unique way of classifying electricity trade data. Guidance will also be given on how to check generation efficiencies, and report the data in the joint annual electricity and heat questionnaire.</i>	TBD
12:20 – 12:35	Q&A	
5min break		
12:40 – 13:25	Dedicated exercise session	TBD
5min break		

Energy Balances Module

13:30 – 13:50	Energy Balances <i>The session will explain the definitions, concepts and conventions underlying the building of a national energy balance. It will show how an energy balance is also the starting point for the construction of various indicators such as energy intensity, energy consumption per capita, of for early estimations of CO2 emissions from fuel combustion. The session combines presentation and hands-on exercises, including featuring the IEA balance builder.</i>	TBD
13:50 – 14:05	Q&A	
5min break		
14:10 – 14:55	Dedicated exercise session	TBD
5min break		

Final Session - Closing

15:00 – 15:15	Training Evaluation/Post training assessment	TBD
15:15 – 15:30	Closing remarks and group photo	TBD
