

Corrigendum: WEI 2020

Issued: 8 June 2020

Link to report: <https://www.iea.org/reports/world-energy-investment-2020>

On page 26, indent the paragraph starting with “The current crisis” so that it is aligned under the paragraph above.

On page 33, Number change from 24% to 15% . First paragraph, last sentence.

However, the estimated **15%** decline compared with 2019 is not quite as severe as those seen in oil and gas supply.

On page 100, remove **se** from the fifth paragraph, last sentence:

They can also facilitate the integration of power systems with more localised networks for heat supply as an another source of flexibility (see Energy End Use and Efficiency**se** section)

On page 153, 5th paragraph, last word, remove the capital letter in the middle, i.e. replace accom**M**odating with accommodating.

(...) accom**M**odating.

On page 160, second paragraph change reference from (IEA 2019 to IEA 2019b)

But such mechanisms also depend on having a robust interconnected system of secondary financial sources and intermediaries, diverse investment vehicles to facilitate flows, and clear signals for investment, based on profit expectations and risk profiles (IEA, 2019**b**).

On page 183, change the chart title to

Spending on energy R&D by national governments **and the EU**

Changes to Figures

On page 75, item “**Average price (right axis)**” is added to the legend

On page 89, values for **Sub-Saharan Africa** are corrected

On page 92, values **Solar PV, Hydropower, Other Renewables and Total Renewables** are corrected

On page 152, values for **Europe were incorrectly classified as Other**.

On Page 192 values in the chart on right hand side for **North America** are shifted by one year forward
