

All the data refer to 2024 market data

✓ Aligned Σ Indirectly aligned Δ Partly aligned ✗ Not aligned ○ Limited applicability

Sector	Fuel / Driving Source	Sink	Type	Sub-type	China	CHPA / ChinaIOL	Europe	EHPA	EuroStat	EHI	Assoclima (Italy)	BWP (Germany)	HPA (UK)	Uniclimate (France)	Japan	JRAIA	METI	United States	AHRI
● Buildings																			
● Electrically driven heat pumps																			
● ASHP																			
● Hydronic distribution																			
● Heat pump water heater (HPWH)																			
● Air-Water (space or combo)																			
● Exhaust Air - Water																			
● Air based distribution																			
● Air- Air*																			
● Small monobloc unit*																			
● Single/Multi-split*																			
● Packaged unit*																			
● Variable refrigerant flow*																			
● Exhaust Air - Air																			
● Ground/water-source heat pump																			
● Hydronic distribution																			
● Brine - Water																			
● Water - Water																			
● Brine/Water - Water																			
● Wastewater - Water																			
● Either air, ground or water																			
● Either hydronic or air based distribution																			
● Chillers*																			
● Heat-recovery*																			
● Thermally driven heat pumps																			
● Either air, ground or water																			
● Either hydronic or air based distribution																			
● Gas engine driven heat pump																			
● Sorption heat pump																			
● Absorption heat pump																			
● Adsorption heat pump																			
● Hybrids																			
● Either air, ground or water																			
● Either hydronic or air based distribution																			
● Hybrid system																			
● Integrated system																			
● Add-on system																			
● Others																			
● Either air, ground or water																			
● Either hydronic or air based distribution																			
● Emerging technologies																			

In order of appearance: EHPA = European Heat Pump Association; EHI = European Heating Industry; BWP = Bundesverband Wärmepumpe; AFPC = Association Française pour les Pompes À Chaleur; HPA = Heat Pump Association; CHPA = China Heat Pump Alliance; JRAIA = Japan Refrigeration and Air Conditioning Industry Association; METI = Ministry of Economy, Trade and Industry; AHRI = Air-Conditioning, Heating, and Refrigeration Institute.

* The matrix shows whether the product is reported for heating or cooling without distinction. For more information about the definitions applied in this matrix, refer to the technical note "Cross-regional Data Reporting Mapping Matrix - Definitions"
