

## Acknowledgements, contributors and credits

This publication has been prepared by the Gas, Coal and Power Markets Division (GCP) of the International Energy Agency (IEA). The analysis was led and co-ordinated by Jean-Baptiste Dubreuil, Senior Natural Gas Analyst. Tetsuro Hattori, Songho Jeon, Akos Lósz, Gergely Molnár and Jean-Baptiste Dubreuil are the main authors. Keisuke Sadamori, Director of the IEA Energy Markets and Security (EMS) Directorate, and Peter Fraser, Head of GCP, provided expert guidance and advice.

Other IEA colleagues provided important contributions including Paulina Becerra Zavala, Joel Couse, Carlos Fernández Alvarez, Hiroyasu Sakaguchi, and Stefan Lorenczik. José Miguel Bermudez Menéndez provided invaluable data/comments and guidance to the hydrogen-related parts of the report, while the CCS/CCUS-related parts have been greatly enriched by the contributions from Niels Berghout and Adam Baylin-Stern.

Timely and comprehensive data from the Energy Data Centre were fundamental to the report. Special thanks go to Mathilde Daugy, Louis Chambeau and Amani Al-Saidi for their support.

The IEA Communication and Digital Office (CDO) provided production and launch support. Particular thanks to Jad Mouawad

and his team: Astrid Dumond, Tanya Dyhin, Merve Erdem, Jethro Mullen, Grace Gordon, Rob Stone and Therese Walsh.

Justin French-Brooks edited the report.

The report was made possible by assistance from SK E&S and Tokyo Gas.

The individuals and organisations that contributed to this report are not responsible for any opinion or judgement it contains. Any error or omission is the sole responsibility of the IEA.
