

Foreword.....	3
Acknowledgements.....	5
Executive summary .....	15
<b>1</b> <b>Overview and key findings</b>	<b>21</b>
Introduction .....	23
1.1 Scenario overview .....	24
1.1.1 Energy demand.....	24
1.1.2 Total final consumption.....	25
1.1.3 CO <sub>2</sub> emissions .....	28
1.2 What do fractured geopolitics mean for the future of energy? .....	29
1.2.1 Fossil fuels .....	29
1.2.2 Clean energy supply chains and critical minerals .....	32
1.3 Are EV sales hitting speed limits?.....	34
1.3.1 Trends in the EV market .....	37
1.3.2 Implications of the transition to EVs for the energy sector.....	37
1.3.3 Key enablers to achieve net zero emissions milestones for EVs .....	38
1.4 How fast might demand for electricity increase?.....	39
1.4.1 Emerging market and developing economies lead demand growth in the STEPS.....	39
1.4.2 Exploring uncertainties in the STEPS .....	40
1.4.3 Clean energy transitions are driving rapid electricity demand growth .....	42
1.5 Is clean power generation growing fast enough? .....	45
1.5.1 Clean power is not yet outrunning global electricity demand growth .....	45
1.5.2 Clean power gets up to speed in most markets by 2030.....	47
1.5.3 Clean power needs to scale up faster to get on track for net zero emissions .....	48
1.6 There is a wave of new LNG coming: where will it go? .....	50
1.7 What will it take to achieve energy access goals by 2030? .....	55
1.7.1 Access to electricity .....	56
1.7.2 Access to clean cooking .....	58
1.7.3 Investment needs to ramp up quickly .....	59

1.8	How to scale up clean energy investment in emerging market and developing economies?.....	61
1.8.1	Breaking down investment requirements .....	63
1.8.2	Challenge of scale .....	66

## 2

### *Setting the scene* 67

2.1	Context for the <i>World Energy Outlook-2024</i> .....	69
2.1.1	Recent trends in energy demand and CO <sub>2</sub> emissions.....	70
2.1.2	Macroeconomic context.....	73
2.1.3	Political and geopolitical uncertainties.....	75
2.2	WEO scenarios.....	78
2.2.1	Policies.....	79
2.2.2	GDP and population.....	87
2.2.3	Prices .....	90
2.2.4	Technology costs .....	93

## 3

### *Pathways for the energy mix* 97

3.1	Introduction.....	99
3.2	Overview .....	100
3.2.1	Energy efficiency.....	101
3.2.2	Renewables .....	103
3.3	Total final consumption.....	105
3.3.1	Transport .....	109
3.3.2	Buildings .....	113
3.3.3	Industry.....	118
3.4	Electricity .....	121
3.4.1	Electricity demand.....	122
3.4.2	Electricity supply.....	125
3.4.3	Power sector CO <sub>2</sub> emissions .....	131
3.4.4	Power sector investment.....	132
3.5	Fuels .....	135
3.5.1	Oil .....	137
3.5.2	Natural gas.....	143
3.5.3	Coal.....	149
3.5.4	Modern bioenergy.....	152

3.6	Key clean energy technologies .....	155
3.6.1	Solar PV.....	156
3.6.2	Wind .....	157
3.6.3	Nuclear .....	158
3.6.4	Electric vehicles .....	159
3.6.5	Heat pumps .....	160
3.6.6	Hydrogen .....	161
3.6.7	Carbon capture, utilisation and storage .....	163

## 4

### *Exploring uncertainties in the Outlook* **165**

4.1	Introduction.....	167
4.2	Exploring the uncertainties .....	168
4.3	Sensitivity analyses relative to the STEPS trajectory .....	170
4.4	Uncertainties in oil demand .....	173
4.4.1	Electric vehicle pace of growth.....	173
4.4.2	PHEV in electric mode operation.....	176
4.4.3	Oil-to-gas switching in the Middle East power sector .....	177
4.5	Uncertainties in natural gas demand .....	178
4.5.1	LNG oversupply.....	179
4.5.2	Higher natural gas demand uncertainties .....	181
4.5.3	Lower natural gas demand uncertainties .....	184
4.6	Uncertainties in electricity demand .....	185
4.6.1	Data centres .....	186
4.6.2	Heat waves .....	189
4.6.3	Appliance efficiency in emerging market and developing economies .....	191
4.6.4	Implications of changes in electricity demand .....	192

## 5

### *Security, affordability and sustainability* **195**

5.1	Introduction.....	197
5.2	Energy security .....	198
5.2.1	Fuel security.....	199
5.2.2	Electricity security .....	207
5.2.3	Security of clean energy supply chains and critical minerals.....	213
5.3	Affordability and people-centred transitions .....	218

5.3.1	Energy bills.....	218
5.3.2	Energy employment .....	222
5.3.3	Energy access.....	225
5.3.4	Behavioural change .....	228
5.4	Sustainability .....	231
5.4.1	Emissions trajectories and temperature outcomes.....	231
5.4.2	Methane abatement.....	234
5.4.3	Air pollution and public health .....	237
5.5	Investment and finance.....	238
5.5.1	Energy investment.....	238
5.5.2	Sources of finance .....	242

## 6

### *Regional insights* **245**

Introduction .....	247
6.1 United States.....	248
6.2 Latin America and the Caribbean .....	252
6.3 European Union.....	256
6.4 Africa .....	260
6.5 Middle East.....	264
6.6 Eurasia .....	268
6.7 China.....	272
6.8 India.....	276
6.9 Japan and Korea .....	280
6.10 Southeast Asia .....	284

### **Annexes**

Annex A. Tables for scenario projections.....	291
Annex B. Design of the scenarios .....	327
Annex C. Definitions.....	355
Annex D. References .....	377
Annex E. Inputs to the Global Energy and Climate Model .....	389
