| Executive summary..... | 17 |

## 1

**Overview and key findings** **23**

|  |    |
|--|----|
| Introduction .....   | 25 |
| 1.1 A peak by 2030 for each of the fossil fuels.....   | 26 |
| 1.1.1 Coal: Scaling up clean power hastens the decline.....  | 27 |
| 1.1.2 Oil: End of the “ICE age” turns prospects around.....  | 28 |
| 1.1.3 Natural gas: Energy crisis marks the end of the “Golden Age”.....                              | 29 |
| 1.2 A slowdown in economic growth in China would have huge implications<br>for energy markets .....  | 31 |
| 1.2.1 China’s growth has defined the energy world in recent decades .....                            | 31 |
| 1.2.2 Integrating a slowdown in China’s economy into the STEPS.....                                  | 32 |
| 1.2.3 Sensitivities in the Outlook.....  | 35 |
| 1.3 A boom of solar manufacturing could be a boon for the world.....                                 | 36 |
| 1.3.1 Solar module manufacturing and trade.....  | 37 |
| 1.3.2 Solar PV deployment could scale up faster to accelerate transitions                            | 38 |
| 1.4 Pathway to a 1.5 °C limit on global warming is very tough, but it<br>remains open.....           | 42 |
| 1.4.1 Four reasons for hope .....  | 42 |
| 1.4.2 Four areas requiring urgent attention .....  | 46 |
| 1.5 Capital flows are gaining pace, but not reaching the areas of greatest need                      | 49 |
| 1.5.1 Fossil fuels .....   | 50 |
| 1.5.2 Clean energy.....  | 51 |
| 1.6 Transitions have to be affordable.....   | 52 |
| 1.6.1 Affordability for households.....  | 53 |
| 1.6.2 Affordability for industry .....   | 55 |
| 1.6.3 Affordability for governments.....   | 57 |
| 1.7 Risks on the road to a more electrified future .....   | 59 |
| 1.7.1 Managing risks for rapid electrification.....  | 60 |
| 1.7.2 Critical minerals underpin electrification .....   | 62 |
| 1.8 A new, lower carbon pathway for emerging market and developing<br>economies is taking shape..... | 63 |

|        |   |    |
|--------|---|----|
| 1.9    | Geopolitical tensions undermine energy security and prospects for rapid, affordable transitions ..... | 68 |
| 1.9.1  | Clean energy in a low-trust world .....   | 69 |
| 1.9.2  | Fossil fuels in a low-trust world .....   | 71 |
| 1.9.3  | Risks of new dividing lines .....   | 72 |
| 1.10   | As the facts change, so do our projections.....   | 73 |
| 1.10.1 | Solar PV and wind generation .....  | 75 |
| 1.10.2 | Natural gas.....  | 77 |

## 2

### **Setting the scene** **79**

|       |   |    |
|-------|---|----|
| 2.1   | New context for the <i>World Energy Outlook</i> .....             | 81 |
| 2.1.1 | New clean energy economy .....                                    | 84 |
| 2.1.2 | Uneasy balance for oil, natural gas and coal markets .....        | 86 |
| 2.1.3 | Key challenges for secure and just clean energy transitions ..... | 88 |
| 2.2   | WEO scenarios.....  | 91 |
| 2.2.1 | Policies.....   | 92 |
| 2.2.2 | Economic and demographic assumptions .....                        | 93 |
| 2.2.3 | Energy, critical mineral and carbon prices.....                   | 95 |
| 2.2.4 | Technology costs .....  | 99 |

## 3

### **Pathways for the energy mix** **101**

|       |  |     |
|-------|--|-----|
| 3.1   | Introduction.....                        | 103 |
| 3.2   | Overview .....                           | 104 |
| 3.3   | Total final energy consumption.....      | 107 |
| 3.3.1 | Industry.....                            | 108 |
| 3.3.2 | Transport .....                          | 113 |
| 3.3.3 | Buildings .....                          | 118 |
| 3.4   | Electricity.....                         | 123 |
| 3.5   | Fuels .....                              | 130 |
| 3.5.1 | Oil .....                                | 130 |
| 3.5.2 | Natural gas.....                         | 135 |
| 3.5.3 | Coal.....                                | 140 |
| 3.5.4 | Modern bioenergy.....                    | 145 |
| 3.6   | Key clean energy technology trends ..... | 147 |

## *Secure and people-centred energy transitions* **155**

|       |  |     |
|-------|--|-----|
| 4.1   | Introduction.....                                      | 157 |
| 4.2   | Environment and climate .....                          | 158 |
| 4.2.1 | Emissions trajectory and temperature outcomes .....    | 158 |
| 4.2.2 | Methane abatement.....                                 | 161 |
| 4.2.3 | Air quality .....                                      | 164 |
| 4.3   | Secure energy transitions.....                         | 166 |
| 4.3.1 | Fuel security and trade .....                          | 166 |
| 4.3.2 | Electricity security .....                             | 171 |
| 4.3.3 | Clean energy supply chains and critical minerals ..... | 178 |
| 4.4   | People-centred transitions .....                       | 183 |
| 4.4.1 | Energy access.....                                     | 183 |
| 4.4.2 | Energy affordability .....                             | 187 |
| 4.4.3 | Energy employment .....                                | 191 |
| 4.4.4 | Behavioural change .....                               | 193 |
| 4.5   | Investment and finance needs .....                     | 197 |

## *Regional insights* **203**

|       |   |     |
|-------|---|-----|
| 5.1   | Introduction.....   | 205 |
| 5.2   | United States .....   | 206 |
| 5.2.1 | Key energy and emissions trends .....   | 206 |
| 5.2.2 | How much have the US Inflation Reduction Act and other recent policies changed the picture for clean energy transitions? .....  | 208 |
| 5.3   | Latin America and the Caribbean .....   | 211 |
| 5.3.1 | Key energy and emissions trends .....   | 211 |
| 5.3.2 | What role for Latin America and the Caribbean in maintaining traditional oil and gas security through energy transitions? ..... | 213 |
| 5.3.3 | Do critical minerals open new avenues for Latin America and the Caribbean’s natural resources? .....                            | 214 |
| 5.4   | European Union.....   | 216 |
| 5.4.1 | Key energy and emissions trends .....   | 216 |
| 5.4.2 | Can the European Union deliver on its clean energy and critical materials targets?.....   | 218 |
| 5.4.3 | What next for the natural gas balance in the European Union? .....  | 219 |
| 5.5   | Africa .....  | 221 |

|        |  |     |
|--------|--|-----|
| 5.5.1  | Key energy and emissions trends .....  | 221 |
| 5.5.2  | Recharging progress towards universal energy access.....   | 223 |
| 5.5.3  | What can be done to enhance energy investment in Africa?.....  | 224 |
| 5.6    | Middle East.....   | 226 |
| 5.6.1  | Key energy and emissions trends .....  | 226 |
| 5.6.2  | Shifting fortunes for energy exports.....  | 228 |
| 5.6.3  | How is the desalination sector changing in times of increasing<br>water needs and the energy transition? ..... | 229 |
| 5.7    | Eurasia .....  | 231 |
| 5.7.1  | Key energy and emissions trends .....  | 231 |
| 5.7.2  | What’s next for oil and gas exports from Eurasia? .....  | 233 |
| 5.8    | China.....   | 236 |
| 5.8.1  | Key energy and emissions trends .....  | 236 |
| 5.8.2  | How soon will coal use peak in China? .....  | 238 |
| 5.9    | India.....   | 241 |
| 5.9.1  | Key energy and emissions trends .....  | 241 |
| 5.9.2  | Impact of air conditioners on electricity demand in India.....   | 243 |
| 5.9.3  | Will domestic solar PV module manufacturing keep pace with<br>solar capacity growth in India? .....            | 244 |
| 5.10   | Japan and Korea .....  | 246 |
| 5.10.1 | Key energy and emissions trends .....  | 246 |
| 5.10.2 | Challenges and opportunities of nuclear and offshore wind.....   | 248 |
| 5.10.3 | What role can hydrogen play in the energy mix and how can the<br>governments deploy it?.....                   | 249 |
| 5.11   | Southeast Asia .....   | 251 |
| 5.11.1 | Key energy and emissions trends .....  | 251 |
| 5.11.2 | How can international finance accelerate clean energy transitions<br>in Southeast Asia? .....                  | 253 |
| 5.11.3 | How can regional integration help integrate more renewables? ....  | 254 |

## Annexes

|  |     |
|--|-----|
| Annex A. Tables for scenario projections.....                | 259 |
| Annex B. Design of the scenarios .....                       | 295 |
| Annex C. Definitions.....                                    | 319 |
| Annex D. References .....                                    | 339 |
| Annex E. Inputs to the Global Energy and Climate Model ..... | 347 |
