CHART 1

Gross consumption of natural gas by OECD region

Total OECD indigenous production of natural gas grew by 4.8% in October 2019 compared to October 2018. This growth was driven by the OECD Americas (+7.6% y-o-y)¹ and OECD Asia Oceania (+7.9% y-o-y). The United States (+9.3% y-o-y) and Australia (+8.3% y-o-y) continued to lead the growth in their respective regions. In OECD Europe, production continued to decline (-11.4% y-o-y), driven by decreases in both the Netherlands (-25.8% y-o-y) and Norway (-10.2% y-o-y). Overall, total OECD indigenous production of natural gas grew by 6.5% in the first 10 months of 2019 when compared to the same period of 2018.

Total OECD imports (entries)² of natural gas remained relatively stable, decreasing by 1.2% in October 2019 compared to October 2018. Overall, LNG imports continued to increase (+4.5% y-o-y), while pipeline imports decreased (-3.1% y-o-y). The decrease was led by OECD Asia Oceania (-8.7% y-o-y), where imports declined in Korea (-16.3% y-o-y), Japan (-3.6% y-o-y) and Australia (-36.7% y-o-y). Imports in the OECD Americas (+0.1% y-o-y) and OECD Europe (+0.4% y-o-y) remained stable.

Increases in total OECD exports (exits)² were observed across all OECD regions, which resulted in a growth of 6.2% when comparing October 2019 to the same period of 2018. The increase was led by the OECD Americas (+23.8% y-o-y), where the United States exits grew by 38.6% on a year-on-year basis. Exports in OECD Europe (+0.5% y-o-y) and OECD Asia Oceania (+0.2% y-o-y) remained steady.

Total OECD natural gas gross consumption increased by 2.0% in October 2019 compared to October 2018. This growth was led by the OECD Americas, where consumption increased by 3.1% on a year-on-year basis with strong increases in both the United States (+2.1% y-o-y) and Canada (+12.7% y-o-y). Robust growth was also observed in OECD Europe (+3.5% y-o-y), where gross consumption significantly increased in the Netherlands (+17.4% y-o-y) and Spain (+19.5% y-o-y). Contrarily, gross consumption in OECD Asia Oceania declined by 5.6% on a year-on-year basis, driven by Japan (-13.8% y-o-y) and Korea (-15.1% y-o-y).

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Transit volumes are included. Trade amounts include intra-regional trade.

CHART 2**Indigenous production of natural gas by OECD region****CHART 3****Net trade of natural gas by OECD region¹**

1. Trade amounts include intra-regional trade.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Chile	October 2019
Israel	January 2010 to October 2019
Mexico	October 2019
New Zealand	July 2019 to October 2019

2) COUNTRY NOTES

A General Note	Starting with January 2011 data, the Imports and Exports no longer represent ultimate origins and destinations but are replaced by Entries and Exits corresponding the amounts that physically crossed the national boundaries of the country.
Australia	The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
Austria	Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
Belgium	Most recent data on origins of imports and final destinations of exports of LNG are the best estimates from the Belgian Administration based on available preliminary data.
Canada	Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
Finland	Finland is reporting stock levels as of January 2019. Therefore, there is a break in stock levels between December 2018 and January 2019.
Iceland	There is no natural gas data for Iceland, as there is neither production nor consumption.
Israel	The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central
Mexico	Observed gross inland deliveries of natural gas from January 2013 onwards are estimated.
Netherlands	Starting with January 2019, more complete trade data is reported based on better information from the GATE terminal. Revisions for historical series are pending. There is a break in stocks between December 2017 and January 2018 due to better compilation methods in the Dutch administration's new data reporting system.
United Kingdom	There is a break in stocks between March and April 2019 due to inclusion of stock held at LNG terminals. Beginning with January 2016, exits to the Isle of Man are reported under Non-Specified/Other. Prior to this date, exits to the Isle of Man were included in exits to Ireland.
