

Australian Government, RAP & IEA

# Policies for Energy Provider Delivery of Energy Efficiency (PEPDEE)

December 2011

Australian Government

Department of Resources, Energy and Tourism

Australian Government

Department of Climate Change  
and Energy Efficiency

# Outline of the day

- Overview of the PEPDEE project
- Clean Energy Future – investigation of a national Energy Savings Initiative
- Regulatory settings for energy provider delivery of energy efficiency – David Crossley (RAP) and Dr Ahmad Faruqui (The Brattle Group)
- International energy efficiency obligations – Grayson Heffner (IEA) and Dr Paolo Bertoldi (EC)
- Panel Discussions
- Applying PEPDEE findings to consideration of a national Energy Savings Initiative

# Clean Energy Future Plan: ESI commitment

- Further work on a national Energy Savings Initiative (ESI)
- The Government will make a final decision on whether to pursue a national ESI conditional on:
  - ✓ Detailed analysis and economic modelling of an appropriate design – including a regulatory impact analysis
  - ✓ Consultation with community, industry and state and territory governments
  - ✓ Agreement of the Council of Australian Governments

# Clean Energy Future Plan: ESI commitment

- The ESI would:
  - have broad coverage (that is, residential, commercial and industrial sectors); and
  - create an incentive or a requirement to create certificates in both low-income homes and in ways which reduce peak electricity demand.
- The design work will consider:
  - the annual targets that would apply;
  - sectoral and fuel coverage issues;
  - energy saving activities to be considered eligible activities; and
  - how a smooth transition from state-based schemes could be managed.

# Further Work - national ESI

- Workshops and technical groups
- Issues Paper – soon to be released and open for comment until mid to late February 2012.
- The National ESI Working Group will release a progress report to Government after first quarter 2012.
- The Government is receiving input from an Advisory Group made up of representatives from the state and territory governments, peak bodies and industry groups.
- Forthcoming workshops
