

# Facing the future together

**From Mediterranean Plans to RE Power Plants**

**Panel 1: The added value of ongoing regional initiatives**

**Michelangelo Celozzi , Secretary General of Med TSO**  
**Rome, 3 October 2012**

# Med-TSO

## main principle and expectations

### Integrated development of Regional energy systems

- A free and independent space of coordinated cooperation between Mediterranean TSOs
- Complementarities between regulatory and electricity system operation functions
- Activation of infrastructural investments at a Regional level

**Med-TSO**  
**Association of the Mediterranean**  
**Transmission System Operators**

# Key steps: sharing of a path between the TSOs

2011

Launch of the  
Med-TSO Project

Convening of the first  
organisational Meeting  
Sending of the Articles of  
Association and discussion  
between the future Members

First organisational  
meeting for the  
finalization of the  
Articles of Association

Economy  
&  
Finance**

**TC6  
Reg. &  
Inst.**

# First Activity of Med-TSO

## Master Plan of the Mediterranean interconnections

1. **Activity proposed by the European Commission.** Findings will be presented on the occasion of the **High Level Meeting of the Euro-Mediterranean Ministries of Energy** (opportunity of visibility for Med-TSO) in the second semester of 2013
2. **The Assembly has unanimously committed herself to support this activity** as the main one for the first year of Med- TSO
3. **Un important challenge:** first engagement of Med-TSO, timing constraints very stricted (june 2013)
4. **Valorize all the possible synergies** (Paving the Way for the MSP data and sources)

**Thank you for your attention**
