<b>Friday December 2<sup>nd</sup> – CCR Expo (room) – Durban</b>	
<b>14:30 – 16:30</b>	<b>8. CLEAN ENERGY FINANCING SEMINAR :- POLICY EFFECTIVENESS</b>
<p><i>According to the International Energy Agency (IEA), \$6 trillion will need to be invested in renewable electricity and bio-fuels over the next 25 years just to meet current emissions reduction commitments. However, climate policy plays a significant role in driving clean energy investment, and also impact the cost, availability, requirements and structure of finance. In addition, financing is necessary for clean energy technology commercialization and for the transition to a low-carbon economy. This session will look at the investment needs to achieve an Energy Technology Revolution and identify possible sources of finance and how to leverage greater private sector finance with public finance mechanisms.</i></p>

FRIDAY, DECEMBER 2<sup>ND</sup>, 2011

<b>Friday December 2<sup>nd</sup> – CCR Expo (room) – Durban</b>	
<b>16:30 – 18:30</b>	<b>9. ENERGY EFFICIENCY FINANCING</b>
<p><i>Financing is one of the largest barriers to improving energy efficiency in developing countries. This session will examine several approaches to how this barrier can be overcome, so that ultimately private sector finance drives investment in energy efficiency. The design of climate funds to facilitate their use in financing energy efficiency projects will be important in developing countries and public-private partnerships can be a useful way to kick-start the market in financing energy efficiency.</i></p> <p><i>This session will present the latest IEA work in these areas and some experience from financing national energy efficiency programmes. In addition, the session will be interactive and will discuss questions relating to how best to structure public finance to leverage private investment in energy efficiency.</i></p>
