

Smart Grid Roadmap... the Development Experience

Joe Durkan SEAI
September 13th, 2012

Smartgrid Roadmap

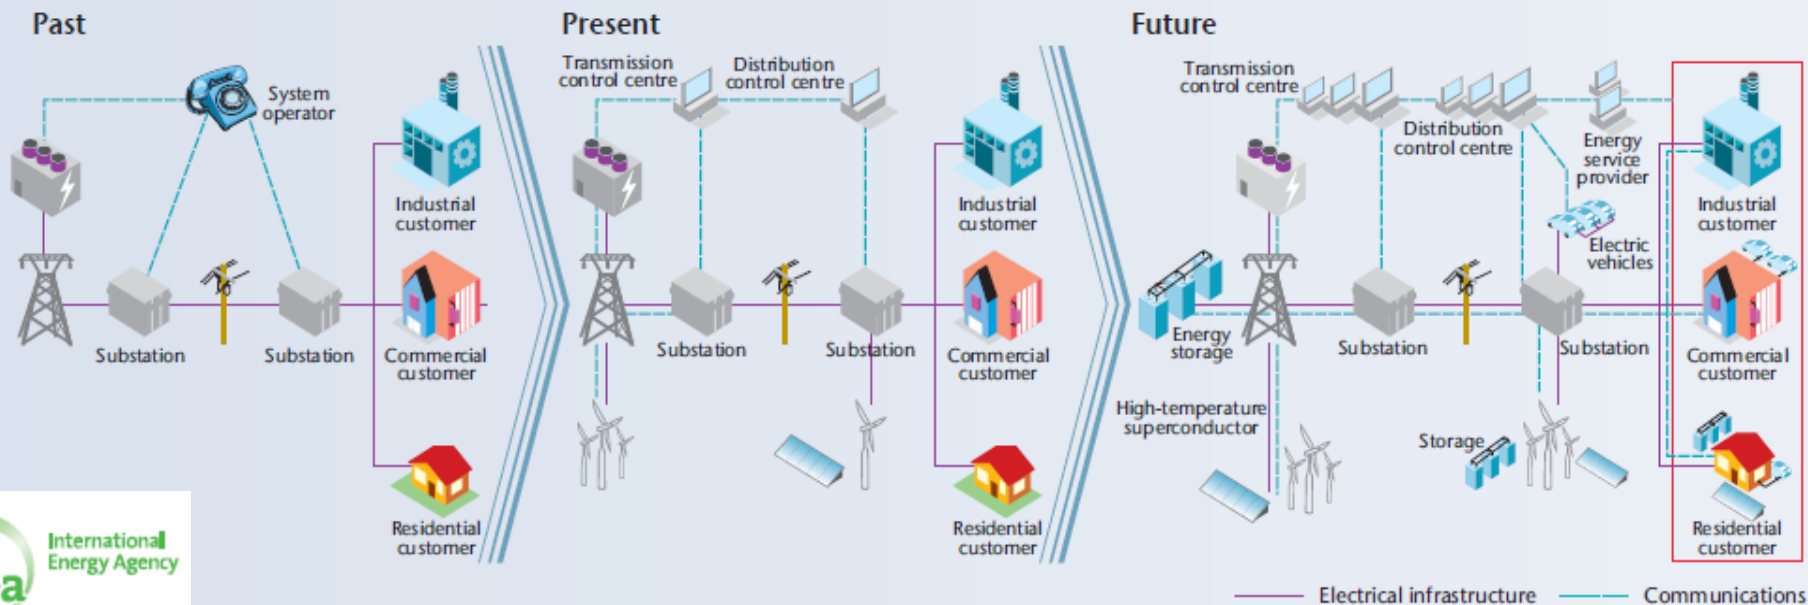

“Borrow” a working definition

The basic concept:

- maximizing throughput of the electricity delivery system while reducing the energy consumption
 - monitoring, analysis, control, communication

The evolutionary process of “smartening” the grid

Smart Grid

Or, more simply...

Balancing variable supply
with demand
without breaking the system

Smart Grid Roadmap

IEA – Guide to Roadmap Development

- Goals – set clear and concise set of targets
- Milestones – specific dates for interim performance targets
- Identify Gaps and Barriers
- Action items – to overcome gaps and barriers
- Priorities and timelines.

Assess for fitness

Big picture too broad...

Figure 13. Regional CO₂ emissions reduction from smart grid deployment

... and too general

Figure 4. Portion of variable generation of electricity by region (BLUE Map Scenario)

Source: IEA, 2010.

KEY POINT: All regions will need smart grids to enable the effective integration of significantly higher amounts of variable resources to their electricity grids.

Roadmap: Know where you're starting from

Smart Grid – the background

RENEWABLE ELECTRICITY

40%

TRANSPORT ENERGY

10%

ENERGY EFFICIENCY

20%

by 2020:

- 40% of electricity to come from renewable sources
- 10% of transport energy to be renewable and 10% of passenger vehicles to be electric
- 20% increase in energy efficiency
- Commitment to deploy smart meters on a national basis
- Funding of over €10 billion on grid and network development

Ireland's Unique Characteristics

- **Small, Advanced Electricity System**
 - Relatively small isolated system
 - 40% renewable challenging
 - New operational strategies and market mechanisms required
- **Single Electricity market**
 - One market
 - One transmission system operator
 - One distribution system operator
 - One great opportunity

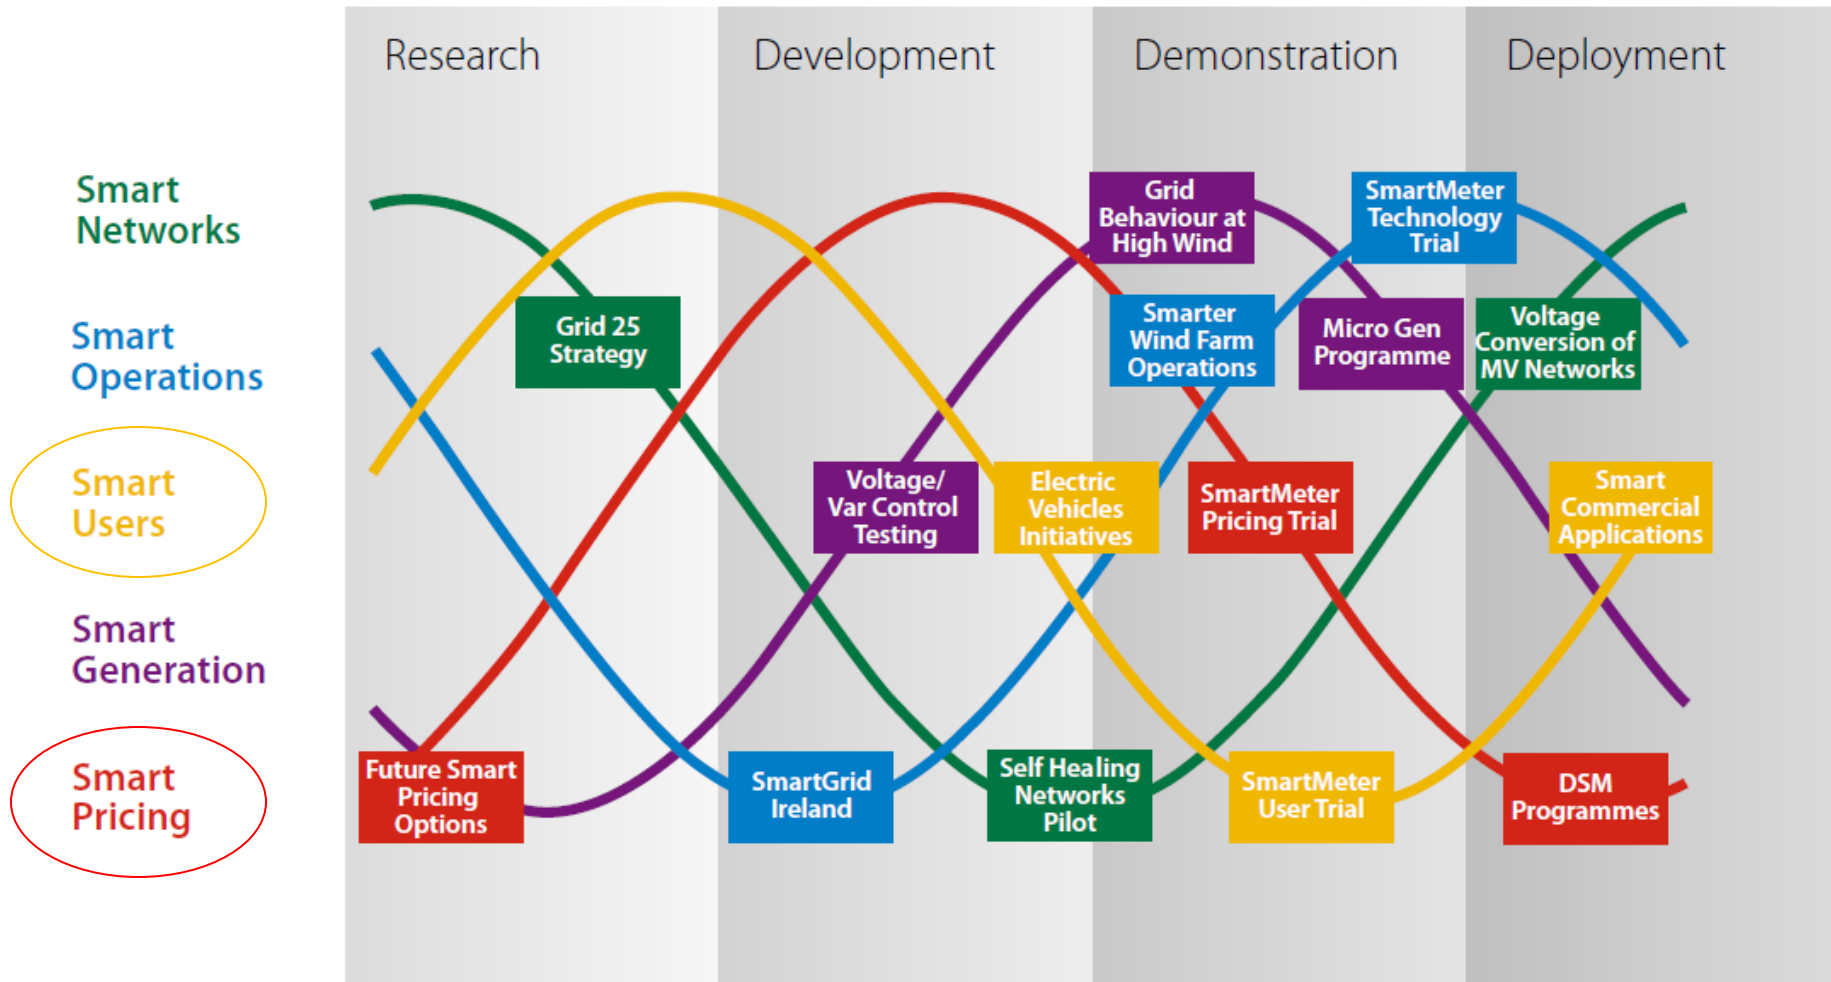

Ireland's Unique Characteristics

- **ICT Infrastructure**
 - IBM, Cisco, Ericsson, Google, Intel ...
 - proven record
- **Research Structure**
 - Focus on industry partnership
 - Electricity Research Centre, IERC...
- **Innovative Smart Grid Companies**
 - Software development
 - Energy services
 - Network technologies

Smart Grid – Current Activities

Smart Grid – Activities

Assemble steering committee and stakeholders....

Roadmap – Steering Group

Industry consultation

Outputs

The Smart Grid

The Smart Grid

Smart Places:

Smart Meter enabled
Automated Load Control /
Smart Appliances / Demand
Side Management / Variable
Tariffs; Home Area Networks /
Building Energy
Management systems; EV
charging; Renewable
electrification of Space and
Water Heating and Cooling
systems; Renewable
electrification of industrial
heating and cooling process
loads...

Smart Renewables:

Maximised renewable
generation; Matching
demand and load to wind
availability; Enabling micro
generation (CHP / PV);
Enabling prosumers; Virtual
Power Plants...

Smart Transport:

Smart Meter enabled electric
vehicle (battery, plug-in
hybrid) charging; Vehicle to
Grid charging (V2G); Large
scale electrification of
transport...

The Smart Grid

Smart Grid:

The smart grid provides the infrastructure, policy and market conditions that will efficiently and intelligently integrate the behaviour and actions of all users connected to it...

Smart Places:

Smart Meter enabled Automated Load Control / Smart Appliances / Demand Side Management / Variable Tariffs; Home Area Networks / Building Energy Management systems; EV charging; Renewable electrification of Space and Water Heating and Cooling systems; Renewable electrification of industrial heating and cooling process loads...

Smart Renewables:

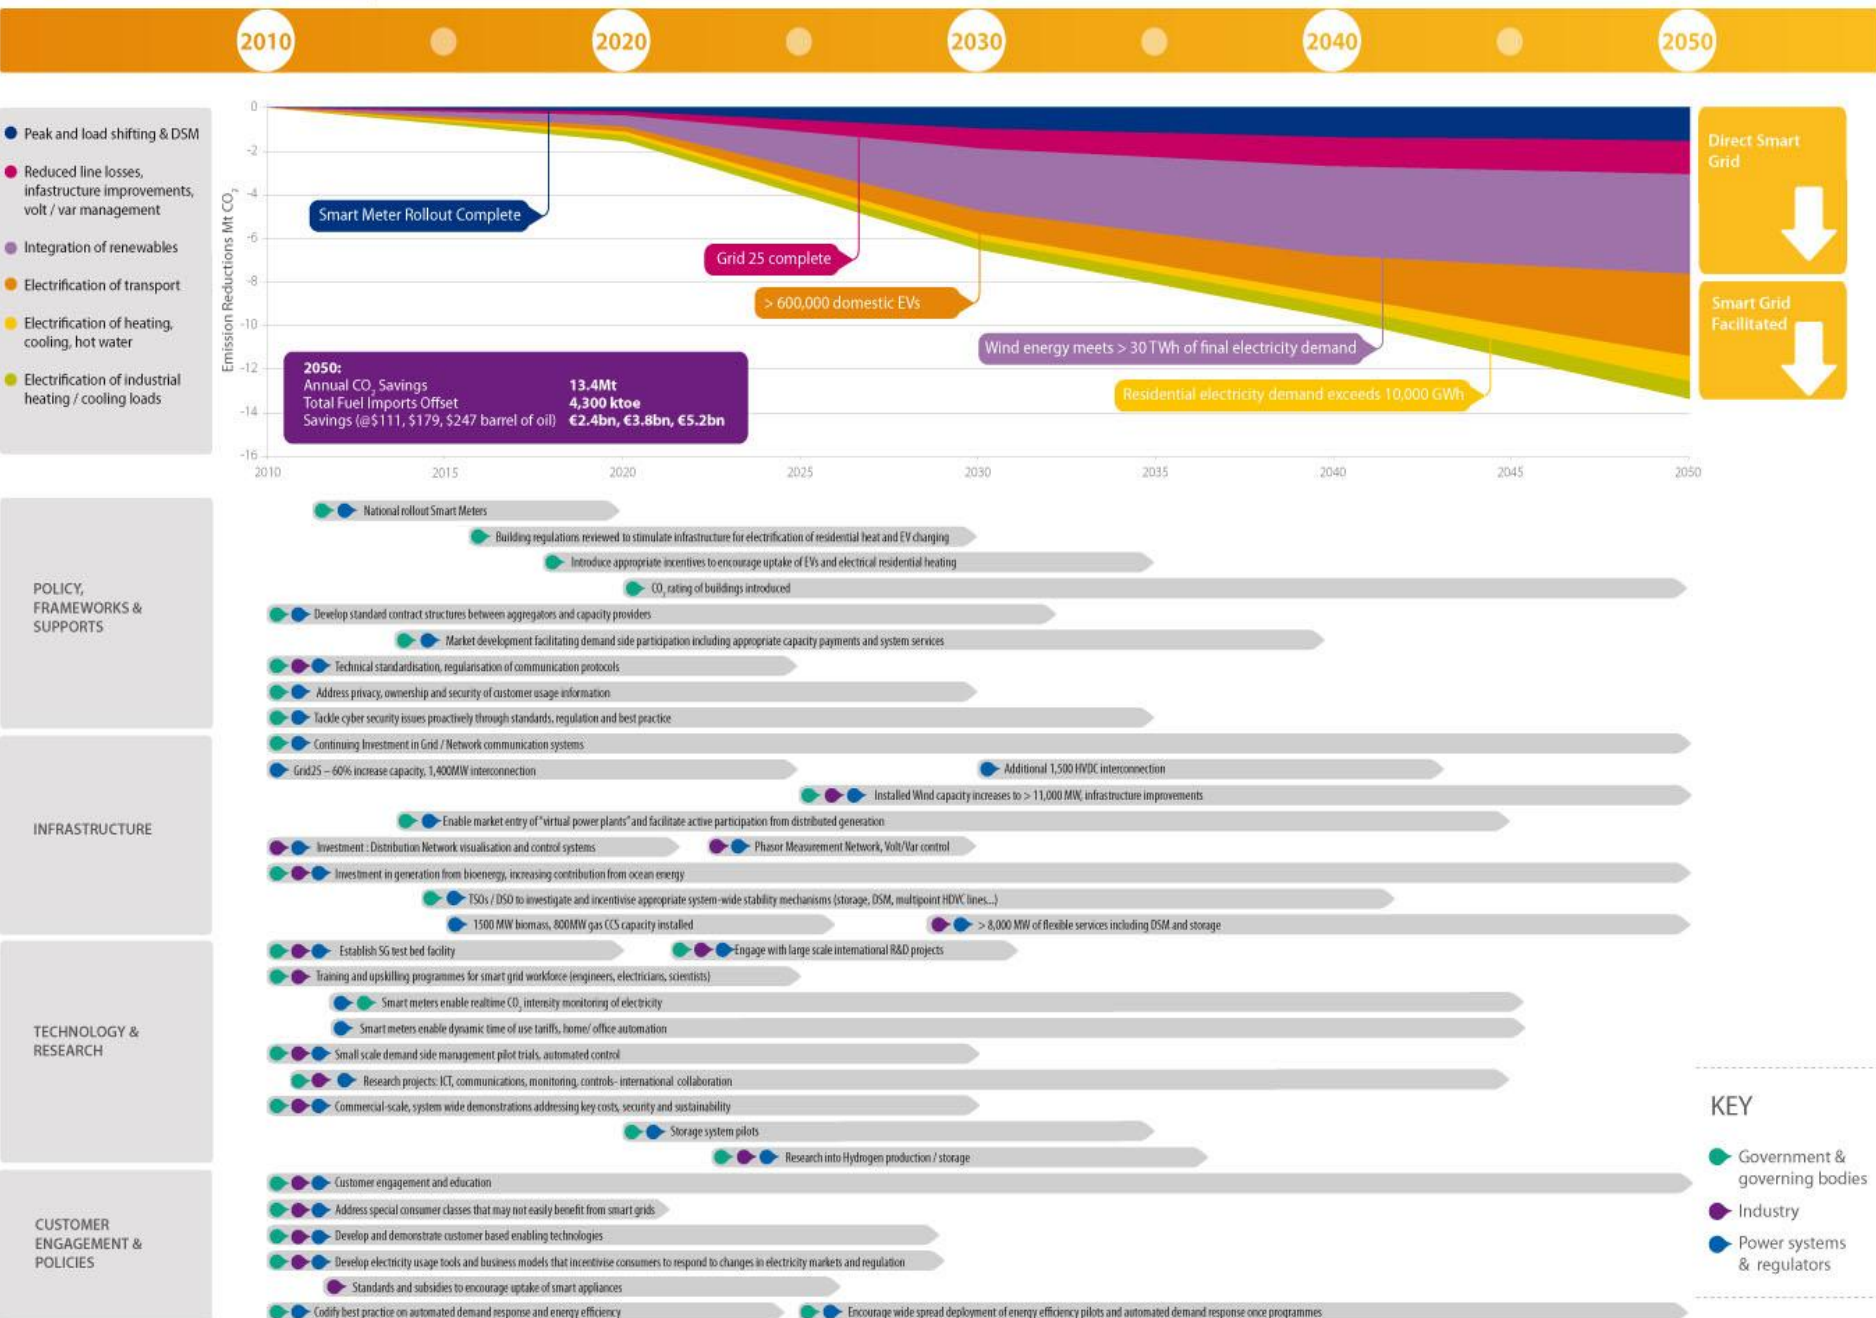

Maximised renewable generation; Matching demand and load to wind availability; Enabling micro generation (CHP / PV); Enabling prosumers; Virtual Power Plants...

Smart Transport:

Smart Meter enabled electric vehicle (battery, plug-in hybrid) charging; Vehicle to Grid charging (V2G); Large scale electrification of transport...

Reduction in electricity related emissions vs. Base Case

Closing comments:

When developing a roadmap, keep in mind:

- One size doesn't fit all
- Roadmap should not be stand alone
- Work within existing policy

Thank You:
