SIDE EVENT

Monday, 18 November 2013

The National Stadium, Warsaw

Room Wroclaw

Time: 20.15-21.45

**Energy policy and technology responses to
increase the pre-2020 ambition for countries to
mitigate climate change**

Following on from the launch of the WEO special report and the IEA presentation at the ADP session on energy transformation in June, the IEA experts will present specific policy aspects of energy efficiency, renewables, and fossil fuels, as well as interaction between carbon pricing policies and energy policies, and tracking progress of clean energy technologies, based on the agency's recent work.

- Opening remarks: Didier Houssin, Director, Directorate of Sustainable Energy Policy and Technology,
- Panelists: Laura Cozzi, Deputy Head of the Directorate of Global Energy Economics; Paolo Frankl, Head of the Renewable Energy Division; Philippe Benoit, Head of Energy Efficiency & Environment Division; Takashi Hattori, Head of the Environment and Climate Change Unit; and Jean-François Gagné, Head, Energy Technology Policy Division.

The format of this event will leave ample room for Q&A with the audience, providing a unique occasion for exchange of views with IEA experts.
