

Latest developments in relevant negotiations on the Paris Agreement Work Programme

2018 InterEnerStat Workshop

Paris, 2 October 2018

Barbara Muik, Programme officer

UNFCCC secretariat, MDA

- PAWP split between 23 agenda items and 3 bodies
 - Complex coordination
 - Many items linked with others
- To be completed in 2018 at COP 24 in Katowice
 - Almost all texts have advanced; clearer and closer to decision-type language
 - None of the texts has been finalized and fully agreed
 - Still many options
- Next step pre-COP

Relevant items under the APA

- Tracking progress on NDCs

Item 3: Further guidance for mitigation section of 1/CP.21

- Information to track progress of NDCs

Item 5: Modalities, procedures and guidelines for the transparency framework for action and support referred to in Article 13 of the Paris Agreement

- National inventory report of GHG emissions and removals

- Tracking progress on NDCs
 - Various views on whether to be included in this section; not at all, or applicable to different types of mitigation targets
 - how (indicators, qualitative, quantitative); where (reports)
- Information to track progress of NDCs
 - Several options (with sub-options); linkages with other items
 - what (content)
- National inventory report of GHG emissions and removals
 - 4 main options; as a minimum, continue with current UNFCCC MRV requirements
 - how (institutional arrangements, methods, metrics); what (sectors, gases); where (reports, reporting tables, frequency)
