

# Energy Efficiency for Emerging Economies (E4)

## E4: Overview

- **4-year programme was launched in 2014**
- **Supports scaled-up energy efficiency activities in major emerging economies**
- **Goal is to generate economy-wide benefits for emerging economies**

## E4: Three levels of engagement

- **Level 1: IEA country micro/macro/meta analysis**
- **Level 2: In-depth country support for EE policy development**
- **Level 3: Multi-country engagement, analysis and international dissemination**

## E4: Mode of engagement

- **For all engagement levels, the IEA works closely with local country officials**
- **Partnerships with other organizations is essential**

## E4: Developing the workplan

- **Prioritises activities that:**
  - **Target important and strategic areas**
  - **Receive buy-in from partner countries**
  - **Build on, and have synergies with, other IEA and international organisation work programmes**
  
- **Takes a portfolio approach – a range of activities, sectors, countries & impacts**
  
- **Mix of quick ‘wins’ & longer-term activities**
