

IEA Energy Efficiency In Emerging Economies Training Week

Industry Stream: Application challenges and next steps

Patrick Crittenden and Louise Vickery

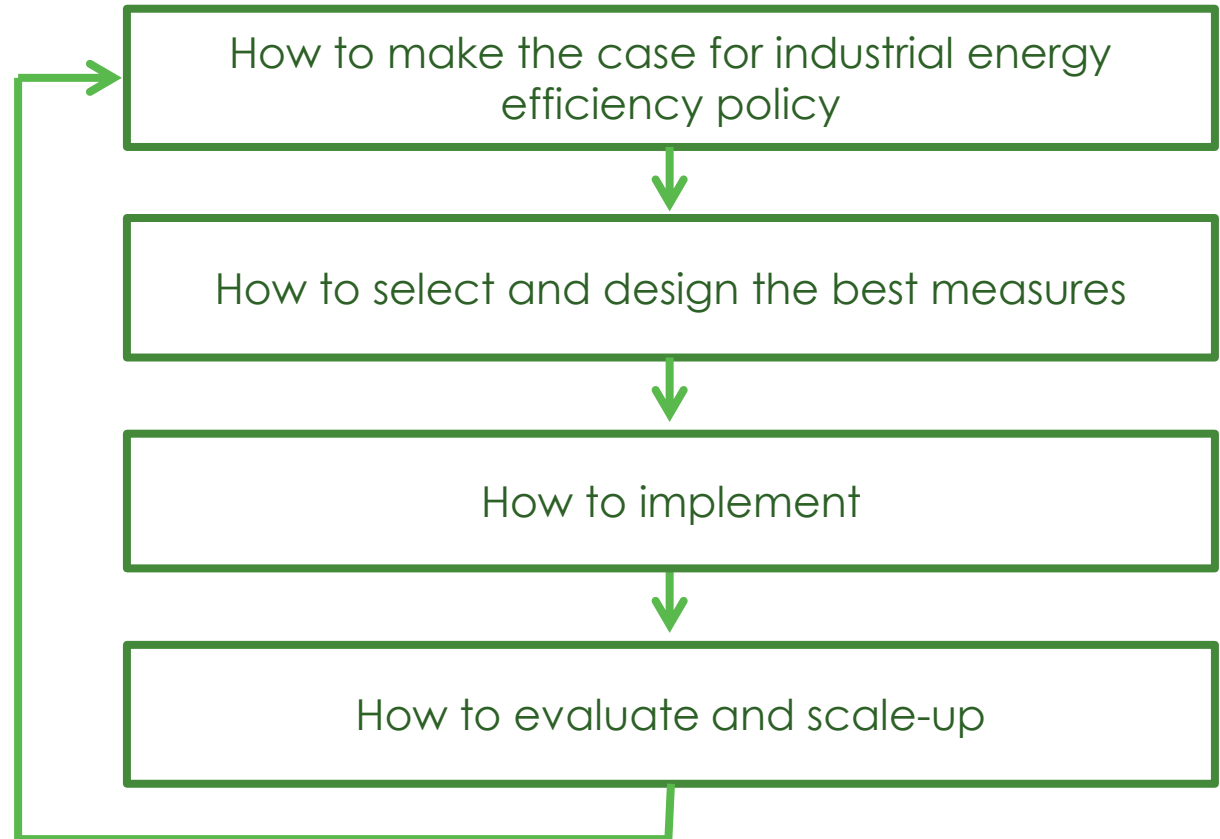

Jakarta, 16-20 July 2018

 #energyefficientworld

- To develop the skills and knowledge of policy makers in emerging economies (YOU) to:
 - Design
 - Implement, and
 - Evaluateenergy efficiency policy.

Course objective: Why are we here?

Develop your skills & knowledge
to deliver
industrial energy efficiency policies & programmes

This session will focus on developing your capabilities to:

- Review the course content to identify the learning that has been most significant for you
- Develop a personal learning development plan

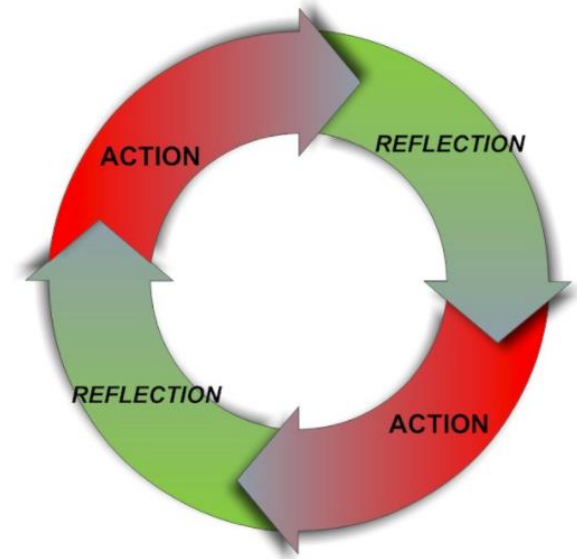

Review and reflect on what you have learnt

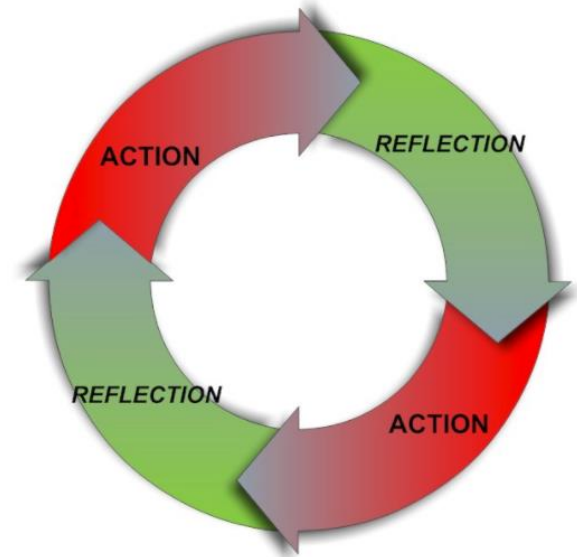

- Take a quick look back through the worksheets and your notes
- Consider:
 - What are the top 3 learning points or 'takeaways' for you?
 - What are the top 3 case studies that will be most useful to you?
 - What are the top 3 things that you learnt from other participants?
- After 10 minutes, share your findings in pairs
- We will then go around the room and have everyone share 1 of their learning points.

- How will you apply your learning back in your workplace?
- How will you know that what you have done has been successful?

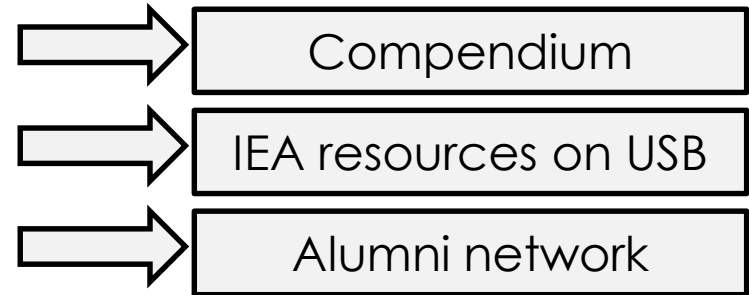

- Identify 1 topic or issue from this training that you would like to learn more about.
- What can you do to continue your learning on this topic or issue?
- Who and what can help you with your learning?

Continuing your learning after this training

- We haven't been able to cover everything in a few days but we can point you in the direction of further support and resources!
