Organisations

## Tips for programme design:

- Look at what others have done – adapt – do things better
- Think long-term
- Build relationships with stakeholders
- Establish partnerships
- Try to cross institutional boundaries
- Don't forget capacity building
- Understand business operations - aim to mainstream
- Monitor changes (technology, economy, politics, trends)

# Day 1 Review

1. Go to the 'Day 1 Review' Worksheet
  - Write down 'key messages'/ 'takeaways' from each session

2. Form groups of 3
  - Share notes

3. Nominate a spokesperson
  - Be prepared to share (in less than 1 sentence!) 1 key message/ takeaway from the day that the group agrees upon

- At the start of Day 2 you will be grouped into pairs.
- One person (the speaker) will have three minutes to describe to the other person (the listener) the rationale and approach being taken for an existing, proposed or 'ideal' energy efficiency policy or programme relevant to your country.
- The speaker and listeners then swap roles.

## Don't forget!
