Energy Efficiency in Emerging Economies

Training Week for Southeast Asia
1-4 April 2019, Bangkok, Thailand

The International Energy Agency and the Department of Alternative Energy Development and Efficiency of Thailand, are pleased to announce the third Energy Efficiency Training Week for Southeast Asia. In recognition of Thailand’s ASEAN Chairmanship 2019, the training will take place in Bangkok from 1 to 4 April 2019.

The Energy Efficiency Training Week aims to build capacity among junior policy makers from Southeast Asia, and to equip them with greater knowledge and skills to develop and implement effective energy efficiency initiatives in their respective countries.

Format of the training

The E4 Training week consists of 5 parallel courses on: energy efficiency in 1) buildings; 2) appliances and equipment; 3) industry; 4) urban planning; and 5) indicators and evaluation.

Each course offers a mix of lectures, interactive discussions and practical exercises that allow participants to learn from international best practice and each other. The programme also includes joint sessions on assessing the potential for energy efficiency, tracking progress, and communication campaigns as well as a special focus on measuring the social and economic benefits of energy efficiency measures.

Target Audience

The training is aimed at junior energy efficiency professionals from government institutions and their supporting organisations who want to make Southeast Asia’s energy efficiency potential a reality. Women with suitable profiles are strongly encouraged to apply.

“We would like to express our thanks and appreciation for the extremely beneficial energy efficiency training course. It was a very good learning experience which provided us with a plethora of best practices in energy efficiency policy.”

Director of Energy Conservation,
Ministry of Energy and Mineral Resources,
Indonesia

Learning together for a better energy future
**The Energy Efficiency Training Weeks/ Background**

Since 2017, the International Energy Agency has been holding week-long training events in Southeast Asia dedicated to sharing experience with planning, implementing and evaluating energy efficiency policies in emerging economies in the region. Initially held in Paris in 2015 and expanded to various regions of the world, these training weeks have brought together over 1,000 energy efficiency professionals from about 90 countries, primarily from government institutions and their supporting organisations in emerging economies.

The E4 programme is part of the IEA Clean Energy Transitions Programme (CETP), which aims to collaborate with target country governments on all aspects of their clean energy transitions with support from a range of donors including Canada, Denmark, the European Commission, Germany, Italy, Japan, Sweden, Switzerland, and the United Kingdom.

**Practical Information**

- There is **no attendance fee** for the training.
- All training courses are delivered in **English** and therefore **proficiency in English is an essential requirement** for all participants.
- Applications are administered via an **online application portal** on the IEA website. Candidates will be informed whether or not their application has been successful via email.
