Where do I get help?
International and regional energy efficiency initiatives

Buildings

IEA #energyefficientworld
Energy Efficiency Training Week: Buildings programme

1. Where to start: Energy use in buildings
2. Where to start: Energy efficiency potential in buildings
3. Toolkit: Energy efficient building design
4. Toolkit: Energy efficient building technologies
   Special session. Technology demonstration

Where do I get help? IEA’s Technology Collaboration Programmes

5. Toolkit: Energy efficiency policies and target setting
6. What are the steps? Enabling investment with energy efficiency policies
7. What are the steps? Implementing building energy codes and standards
8. What are the steps? Building operations and procurement
   Special session. The multiple benefits of energy efficiency

9. Did it work? Evaluation and energy efficiency indicators
   Where do I get help? International and regional energy efficiency initiatives

10. Energy efficiency quiz: Understanding energy efficiency in buildings
Where do I get help? International and regional initiatives that can help

Trainers: Brian Dean and Pierre Jaboyedoff

Purpose: To discuss the Building Efficiency Accelerator, GlobalABC, WorldGBC, BEEP India, PEEB, and other international and regional initiatives.
Building Efficiency Accelerator

www.BuildingEfficiencyAccelerator.org
UN Sustainable Energy for All & Energy Efficiency Accelerators

One Goal:
Achieving Sustainable Energy for All by 2030

Three Objectives:
- Ensuring universal access to modern energy services.
- Doubling the global rate of improvement in energy efficiency.
- Doubling the share of renewable energy in the global energy mix.

Six Energy Efficiency Accelerators:
- Appliances & Equipment: Global market transformation to efficient appliances & equipment.
- Buildings: Promote sustainable building policies & practices worldwide.
- District Energy: Support national & municipal governments to develop or scale-up district energy systems.
- Lighting: Global market transformation to efficient lighting.
- Vehicle Fuel Efficiency: Improve the fuel economy capacity of the global car fleet.
Building Efficiency Accelerator: partners

Coordinating Partner:

NGOs/Associations/Multilaterals:

Service Providers/Companies:

Source: BuildingEfficiencyAccelerator.org
Building Efficiency Accelerator: partners

Subnational Jurisdictions:

Source: BuildingEfficiencyAccelerator.org
Overarching commitment:
double the rate of building energy efficiency by 2030 in targeted sector within the jurisdiction

- Implement one enabling policy
- Implement one demonstration project
- Create a baseline, track and report annual progress, and share experiences with other governments

Source: BuildingEfficiencyAccelerator.org
Building Efficiency Accelerator: what is provided?

- **Local action prioritization process**
- **Tools, expertise and solutions**
- **Funding opportunities**
- **International recognition and collaboration**

**Collaborative, multi-stakeholder assessments and workshops to define and prioritize policies and projects**

**Technical support through trainings, tools. Access to network of subject matter experts and service providers.**

**Connect projects in need to financial partners who can provide funding to efficiency actions**

**Recognition of efficiency actions at international events. Knowledge sharing through a global network of peers.**

Regional programmes
Indo-Swiss Building Energy Efficiency Project

• Bilateral cooperation between the Ministry of Power (MoP), Government of India and the Federal Department of Foreign Affairs (FDFA) of the Swiss Confederation

• The project has 4 components:
  - Component 1: Building Design
  - Component 2: Building Technology
  - Component 3: Building Policy
  - Component 4: Outreach

• Working to strengthen architecture and engineering education system on Energy-Efficient and Thermally Comfortable buildings, providing technical assistance to develop building energy efficiency regulations for residential buildings and developing new technical tools and solutions

Source: www.bEEPindia.org
Created with the ambition that “Projected energy use in buildings in 2030 can be reduced by 50% using today’s best practices and technologies, through actions that offer favorable economic returns”

Energy Efficiency Toolkit for Buildings: guide to make the business case

Held stakeholder workshops (EEB Laboratories) and developed action plans and local action platforms in the following cities:

- Houston
- Jaipur
- Jakarta
- Shanghai
- Warsaw
- Amsterdam
- Bangalore
- Kuala Lumpur
- Rio de Janeiro
- San Francisco
- Singapore
- Paris
- Zurich

There are currently 72 member Green Building Councils around the world, each at different stages of their own green building journey. Including a number in the region:

- Pakistan
- India
- Singapore
- Vietnam
- Hong Kong
- Taiwan
- Mauritius
- Sri Lanka
- Malaysia
- Philippines
- Indonesia

Global Alliance for Buildings and Construction

www.globalabc.org
Global Alliance for Buildings and Construction (GABC)

**Membership:** includes government, private and non-profit organisations and programmes

**Three Common Global Objectives:**

- **Communication:** Raise awareness & make visible the magnitude of the opportunities and impacts in the buildings sector.
- **Collaboration:** Public policies, market transformation, foster partnerships, sharing know-how and improving access to efficient financing and funding.
- **Solutions:** Offering programs to put the buildings sector on a below 2°C path

**Five working groups:**
- Education and Awareness
- Public Policies
- Market Transformation
- Financing
- Buildings Information and Measurement

**Key activities:**
- Global Status Report
- Global Roadmap
- Regional Roundtables
- Buildings Day at COP

Programme for Energy Efficiency in Buildings (PEEB)

• PEEB is a French-German joint-initiative as an implementation programme of the Global ABC

• working with governments together with other actors

• an international initiative to facilitate financing of large-scale programmes in the building sector (focus on new buildings) in developing and emerging countries

• provides technical assistance at country level

• advances sustainable building design and construction and works towards zero emission buildings

• First partner countries: Mexico, Morocco, Senegal, Tunisia, Vietnam
