

**Alastair Blyth** is an analyst at the OECD and works in the Centre for Effective Learning Environments (CELE) in the education directorate. From July 2011 to February 2012 he was an analyst at the International Energy Agency and was on secondment from the OECD. At the IEA he worked on country policies for energy efficiency in buildings and a database of energy efficiency policies and codes for buildings. Alastair trained as an architect, and before joining the OECD in August 2007, he ran a research programme on building performance and taught at the University of Westminster and taught at UCL. He co-authored a book *Managing the Brief for Better Design*, the second edition of which was published in 2010.
