

Philippe Quirion is a researcher in environmental economics and energy economics. He works at the International research centre on environment and development (CIRED). He has a PhD from the Ecole des Mines de Paris. His current research focuses in particular on the competitiveness impact on climate policies, on the choice of climate policies under uncertainty on the impact of climate change and on energy-efficiency policies. On the latter topic, he has contributed to the development of Res-IRF, a model of the French residential sector, and co-authored two papers based on this model in *Energy economics* and *The Energy Journal*.
