

Steve Selkowitz

Stephen Selkowitz is the Head of the Building Technologies Department, where his responsibilities include management and technical oversight of 80 staff in six major RDD&D activities: Commercial Building Systems, Building Simulation Research, Windows and Daylighting, Lighting Systems, Demand Response Research, and the Applications Team. He is a member of the Board of Directors of the National Fenestration Rating Council and was a past Board member of the International Alliance for Interoperability. As an internationally recognized

expert on facade systems and daylighting, he collaborates with R&D teams worldwide in this field. He is a frequent invited speaker to industrial and professional groups on many aspects of commercial building energy efficiency, and is the author/co-author of over 170 publications, 3 books and holds 2 patents. Before joining LBNL he was a principal in a consulting engineering firm and taught courses in Environmental Controls and Alternative Energy Systems. Selkowitz holds a BA in Physics from Harvard College and an MFA in Environmental Design from California Institute of the Arts.
